

OBSTETRICS AND GYNECOLOGY (OBG)

The following course is offered by the Faculty of Medicine.

OBG 6101 Obstetrics and Gynaecology (2 units)

This block of about 40 weeks deals with basic concepts in reproductive biology as they relate to the practice of obstetrics and gynaecology.

The course stresses reproductive endocrinology, the basic science of perinatal medicine and neonatology and the basic principles of surgery as applied to gynaecology and gynaecological oncology.

Course Component: Lecture
