DOCTORATE IN PHILOSOPHY POPULATION HEALTH

Summary
• Degree offered: Doctorate in Philosophy (PhD)
• Registration status option: Full-time
• Language of instruction:
  • French
  • English
  • Bilingual (French-English)

Note: The core courses are offered in a bilingual format which requires students’ passive understanding of both official languages. Students may express themselves orally in either official language. Several of the suggested elective courses are offered in both English and French.

• Program option (expected duration of the program):
  • with thesis (12 full-time terms; 48 consecutive months)
• Academic units: Faculty of Health Sciences (http://health.uottawa.ca), Interdisciplinary School of Health Sciences (http://health.uottawa.ca/interdisciplinary), Faculty of Medicine (http://med.uottawa.ca/en), Faculty of Social Sciences (https://socialsciences.uottawa.ca), Telfer School of Management (http://www.telfer.uottawa.ca/en), Faculty of Law (Common Law Section) (https://commonlaw.uottawa.ca/en).

Program Description
The population health doctoral program is offered through a collaboration of five faculties: the Faculty of Health Sciences, the Faculty of Medicine, the Faculty of Social Sciences, the Telfer School of Management, and the Faculty of Law (Common Law Section).

The program is administratively hosted by the Faculty of Health Sciences. This program is modeled on a framework that encompasses population health issues; determinants and causes of health illness inequities; and population health interventions, including programs, policies and resource distribution systems.

Unique in Canada, this program draws on a wide range of disciplines, both basic and applied. It brings together the insights of social, biological, clinical, organizational, and political sciences, among others. It also draws on and combines the strengths of quantitative and qualitative methods. The transdisciplinary approach of the program recognizes the inherent complexity of many population health problems and the need to tackle these issues through both health and other sectors.

The program is designed to meet the needs of a wide variety of candidates, such as health professionals and health administrators; demographers, epidemiologists and biostatisticians; social, behavioural and legal scholars; environmental scientists; and biologists with an interest in human population health.

Students are encouraged to apply the science of their individual background disciplines to issues of population health. They acquire a broad knowledge of population health through courses and the comprehensive examination, and pursue in-depth study in an area of specialization within the population health framework. Students undertake their research in a range of settings (from local to global).

Main Areas of Research
This doctoral program brings together expertise from faculties, research centres and institutes across the University.

Other Programs Offered Within the Same Discipline or in a Related Area
• Master of Science Interdisciplinary Health Sciences (MSc)

Fees and Funding
• Program fees:
  The estimated amount for university fees (https://www.uottawa.ca/university-fees) associated with this program are available under the section Finance your studies (http://www.uottawa.ca/graduate-studies/programs-admission/finance-studies).

International students enrolled in a French-language program of study may be eligible for a differential tuition fee exemption (https://www.uottawa.ca/university-fees/differential-tuition-fee-exemption).

• To learn about possibilities for financing your graduate studies, consult the Awards and financial support section (https://www.uottawa.ca/graduate-studies/students/awards) section.

Notes
• Programs are governed by the general regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations) in effect for graduate studies.
• In accordance with the University of Ottawa regulation, students have the right to complete their assignments, examinations, research papers, and theses in French or in English.

Admission Requirements
For the most accurate and up to date information on application deadlines, language tests and other admission requirements, please visit the specific requirements (http://www.uottawa.ca/graduate-studies/programs-admission/apply/specific-requirements) webpage.

To be eligible, candidates must:
• Have a master’s degree, with a minimum average of 80% (A-) or equivalent, in a field related to population health (for example, epidemiology, human kinetics, interdisciplinary health sciences,
Documents Required for Admission

In addition to the documents required (http://www.uottawa.ca/graduate-studies/programs-admission/apply/required-documents) for graduate and postdoctoral studies, candidates must submit the following documents:

- A resume
  Letter outlining your professional goals and proposed research area.
- The additional information (https://www.uottawa.ca/graduate-studies/sites/www.uottawa.ca.graduate-studies/files/pop-knowledge-assessment.docx) (knowledge assessment) form
- The acceptance of supervision (https://www.uottawa.ca/graduate-studies/sites/www.uottawa.ca.graduate-studies/files/pop-confirmation_of_supervision.docx) form
- The language requirement (https://www.uottawa.ca/graduate-studies/sites/www.uottawa.ca.graduate-studies/files/pop-language-requirement.docx) form
- Two confidential letters of recommendation from professors who have known the applicant and are familiar with their work.

You are strongly encouraged to contact your referee(s) prior to submitting your application in order to confirm their email address and their availability to complete your letter of recommendation.

- Transcripts from all universities attended:
  - You must submit official transcripts from all the universities you have attended.
  - This applies to all courses and programs at any university you attended, including regular programs (completed or not), exchanges, letters of permission, online or correspondence courses, courses taken as a special student or visiting student, etc.
  - If the transcript and degree certificate are not in English or French, a certified translation (signed and stamped/sealed) must be submitted.

Note: Documents that are not required for admission will not be consulted, conserved or returned to the student. These documents will be destroyed according to our administrative procedures.

Information about how to apply to this program is available under the Apply Now (http://www.uottawa.ca/graduate-studies/programs-admission/apply/#apply-now) section.

Students should complete and submit their online application with supporting documentation (if applicable) by the deadline indicated above.

Program Requirements

Doctorate

Students must meet the following requirements:

Compulsory Courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>POP 8910</td>
<td>Scientific Paradigms in Population Health</td>
<td>3</td>
</tr>
<tr>
<td>POP 8920</td>
<td>Investigative Methods in Population Health</td>
<td>3</td>
</tr>
</tbody>
</table>

Notes:

- The admission requirements listed above are minimum requirements and do not guarantee admission to the program.
- Admissions are governed by the general regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations) in effect for graduate studies.
Doctorate in Philosophy Population Health

Note(s)

1. The elective courses must be related to student's research area. The elective courses are assigned following deliberations by the Graduate Program Committee. Any prerequisites must be completed prior to taking the assigned electives.

2. Students are responsible for ensuring they have met all of the thesis requirements (http://www.uottawa.ca/graduate-studies/students/theses).

Minimum Requirements

The passing grade in all courses is C+.

Students who incur two failures in courses, the comprehensive exam or the thesis proposal, or whose research progress is deemed unsatisfactory are withdrawn from the program.

Research

Research Fields & Facilities

Located in the heart of Canada’s capital, a few steps away from Parliament Hill, the University of Ottawa is among Canada’s top 10 research universities.

uOttawa focuses research strengths and efforts in four Strategic Areas of Development in Research (SADRs):

- Canada and the World
- Health
- e-Society
- Molecular and Environmental Sciences

With cutting-edge research, our graduate students, researchers and educators strongly influence national and international priorities.

Research at the Faculty of Health Sciences

Research at the Faculty involves many important aspects of health, including women’s health, health in the elderly, health needs of francophones in a minority context, Aboriginal health, physical activity and health, multiple interventions in population health, palliative care, rehabilitation and functional autonomy, health and technology, and evidence based practice.

Facilities, Research Centres and Institutes at the Faculty of Health Sciences

- The Ottawa Hospital Research Institute
- The Children’s Hospital of Eastern Ontario Research Institute

Courses

POP 8900 Études dirigées en santé des populations / Directed Studies in Population Health (3 crédits / 3 units)

Volet / Course Component: Recherche / Research

POP 8910 Paradigmes scientifiques en santé des populations / Scientific Paradigms in Population Health (3 crédits / 3 units)

Volet / Course Component: Cours magistral / Lecture

For more information, refer to the list of faculty members and their research fields on Uniweb.

IMPORTANT: Candidates and students looking for professors to supervise their thesis or research project can also consult the website of the faculty or department (https://www.uottawa.ca/graduate-studies/students/academic-unit-contact-information) of their program of choice. Uniweb does not list all professors authorized to supervise research projects at the University of Ottawa.
POP 8920 Méthodes de recherche en santé des populations / Investigative Methods in Population Health (3 crédits / 3 units)
Méthodes de recherche utilisées selon les disciplines : points communs et différences. Critique de l'information actuelle sur la santé des populations; intégration de méthodes quantitatives et qualitatives pour analyser les questions complexes de santé des populations; stratégies pour incorporer les données à la planification et à la prise de décisions centrées sur les résultats. / Investigation of research methods used by contributing disciplines, their commonalities and distinctions. Critique of existing population health information; integration of qualitative and quantitative methods for analyzing complex population health issues; strategies for incorporating results into evidence-based planning and decision-making. Concomitant : POP 8910. / Corequisite: POP 8910.
Volet / Course Component: Cours magistral / Lecture
Investigation of research methods used by contributing disciplines, their commonalities and distinctions. Critique of existing population health information; integration of qualitative and quantitative methods

POP 8930 Interventions en santé des populations / Population Health Interventions (3 crédits / 3 units)
Analyse des modes d'intervention qui peuvent avoir un effet sur la santé des populations. Influences du contexte sur les méthodes de promotion de la santé, prévention des maladies et gestion des risques pour les individus et les populations ainsi que leurs interactions. Etablissement d'équipes interdisciplinaires et de partenariats intersectoriels. Changements durables dans les systèmes, y compris la réforme des soins de santé et le développement de politiques. / Examination of approaches to influence population health. Contextual influences on, and interactions between individual and population health approaches for health promotion, disease prevention, and risk management. Process for establishing transdisciplinary teams and intersectoral partnerships. Sustainable systems change including health care reform and policy development.
Volet / Course Component: Cours magistral / Lecture
Préalables: POP 8910 and POP 8920 / Prerequisites: POP 8910 and POP 8920

POP 8940 Stage en politique de santé des populations / Population Health Policy Practicum (3 crédits / 3 units)
Stage de trois mois permettant aux étudiants d'être en contact et d'avoir des discussions en classe avec des décideurs au niveau des politiques nationales; stage se déroulant habituellement sous la responsabilité de deux mentors, un chercheur associé à l'université et un décideur. Examen des préalables et des procédés de formulation pour la mise en place et l'évaluation des politiques de santé des populations. Analyse et dépouillement des résultats de la recherche et communication aux décideurs clés des conclusions pertinentes. Préparation et critique de notes de synthèse, présentation d'un séminaire et rédaction d'un rapport évalué par le chercheur associé à l'Université. / Three-month practicum providing opportunities for interactions and class discussions with policy makers in a national policy setting, usually with co-mentors, one being a university-based researcher, the other a policy maker. Examination of prerequisites and processes for formulating, implementing and evaluating population health policies. Analysis and distillation of research findings and communication of relevant conclusions to key policy makers. Preparation and critique of briefing notes, presentation of a seminar and submission of a report to be evaluated by the university-based researcher.
Volet / Course Component: Stage / Work Term
Préalables : POP 8910, POP 8920, POP 8930. / Prerequisite: POP 8910, POP 8920 and POP 8930.
