# HONOURS BSC BIOCHEMISTRY -MICROBIOLOGY AND IMMUNOLOGY OPTION

Biochemistry is the chemistry of life. It provides the foundation for understanding all biological processes as well as the molecular basis and treatment of human disease.

The biochemistry bachelor's provides you with the education you need to play a leading role in new and exciting areas of medical research. You will be exposed to cutting-edge research and knowledge. Our program prepares you for graduate studies and for an academic or research career in the medical sciences. What's more, biochemistry provides an excellent foundation for further studies in medicine and other areas of health care.

You can choose an Honours BSc in Biochemistry, a major or a minor.

If you want to pursue a career in experimental biochemistry, choose the Honours program. If you prefer a basic biochemistry education, choose a major. And if you want to focus on another discipline but are interested in biochemistry, choose a minor.

If you have a particular interest in microorganisms and the role that the immune system plays in health and disease, you can also choose an Honours BSc in biochemistry with an option in microbiology and immunology. We also offer an integrated biotechnology program that lets you combine studies in biochemistry and chemical engineering and receive both a BSc in biochemistry and a BASc in chemical engineering in five years.

As for the language of instruction, compulsory courses and many optional course units are available in either English or French.

If you choose the Honours in Biochemistry, you have the opportunity to complete a full-year research project under the supervision of a professor from the departments of Chemistry and Biomolecular Sciences, Biology, Physics, or Biochemistry, Microbiology and Immunology, or under the supervision of an affiliated principle investigator from one of the many research institutes in the National Capital Region. Given the breadth of research expertise within our program, you can conduct research in many areas of modern biomedicine, including biochemistry, microbiology, immunology, chemical biology, molecular biology, cell biology, proteomics, genomics, systems biology and bioinformatics.

This program is offered in English and in French.

## **Program Requirements**

Co-operative education is available with this program.

The French immersion stream is available with this program.

Requirements for this program have been modified. Please consult the 2022-2023 calendars (http://www.uottawa.ca/academic/info/regist/1516/calendars/) for the previous requirements.

#### **Basic Skills**

3 optional course units in English (ENG) at the 1000 or 2000 3 Units level

#### Compulsory courses at the 1000 level

Compulsory o	courses at the 1000 level			
BIO 1130	Introduction to Organismal Biology	3 Units		
BIO 1140	Introduction to Cell and Molecular Biology	3 Units		
CHM 1311	Principles of Chemistry	3 Units		
CHM 1321	Organic Chemistry I	3 Units		
MAT 1330	Calculus for the Life Sciences I	3 Units		
MAT 1332	Calculus for the Life Sciences II	3 Units		
PHY 1321	Principles of Physics I	3 Units		
Compulsory o	courses at the 2000 level			
BCH 2333	Introduction to Biochemistry	3 Units		
BIO 2133	Genetics	3 Units		
CHM 2120	Organic Chemistry II	3 Units		
CHM 2123	Laboratory of Organic Chemistry II	3 Units		
CHM 2132	Physical Chemistry for the Life Sciences	3 Units		
MAT 2379	Introduction to Biostatistics	3 Units		
Compulsory courses at the 3000 level				
BCH 3120	General Intermediary Metabolism	3 Units		
BCH 3125	Protein Structure and Function	3 Units		
BCH 3170	Molecular Biology	3 Units		
BCH 3346	Biochemistry Laboratory II	3 Units		
BCH 3356	Molecular Biology Laboratory	3 Units		
BIO 3124	General Microbiology	3 Units		
BIO 3126	General Microbiology Laboratory	3 Units		
BIO 3153	Cell Biology	3 Units		
Compulsory o	courses at the 4000 level			
BCH 4932	Biochemistry Seminar	3 Units		
MIC 4124	Pathogenic Bacteriology	3 Units		
MIC 4125	Immunology	3 Units		
MIC 4126	Virology	3 Units		
One option fro	om the following:	9 Units		
	lonours Project			
BCH 4040	Honours Research - Biochemistry <sup>2</sup>			
Option 2: H	Ionours Project Substitution			
3 course u	nits from:			
BPS 4104	Bioinformatics Laboratory			
BPS 4127	Advanced Techniques in Biosciences			
•	onal course units at the 3000 and 4000 level in			
science				
Optional Coul				
3 course unit		3 Units		
	Principles of Physics II			
	Physics in Biology			
3 course units		3 Units		
	Human Genome Structure and Function			
	Structural Biology of Proteins <sup>3</sup>			
	Pathological Biochemistry			
	Carbohydrates and Glycobiology			
	Cellular Regulation and Control			
	Structural Biology of Membranes			
	Topics in Biotechnology			
	Synthetic Biology <sup>3</sup>			
BCH 4300	Selected Topics in Biochemistry			

Т	otal:		120 Units
18 elective course units			18 Units
T			
9 elective course units from the Faculty of Arts, Faculty of Education, Faculty of Law, Faculty of Social Sciences or the		9 Units	
E	lectives		
	CHM 4139	Enzyme Chemistry and Biocatalysis	
	BPS 4129	Advanced Chemical Biology	
	BPS 3101	Genomics	

### Note(s)

1

This course runs from September to April.

2

BCH 4040 is highly recommended. A minimum CGPA of 6.5 or greater or a GPA of 6.5 or greater calculated from the two most recent years of full-time study in the Honours Biochemistry program (minimum of 54 units including all compulsory all compulsory 3000 level courses) is required. This course runs from September to April.

3

This course may not be available every year.
