

MICROPROGRAM IN ENVIRONMENTAL ECONOMICS AND PUBLIC POLICY

Environmental issues fill the headlines — climate change, pollution, species loss, to name but a few. In this microprogram, you will study important questions such as how it might be possible to grow the economy while protecting the environment at the same time. You will reflect and exchange on the complexities of our current model of economic development and evaluate how sustainable it is.

Program Requirements

Compulsory Courses

ECO 1104	Introduction to Microeconomics	3 Units
ECO 2118	Introduction to Environmental and Natural Resources Economics	3 Units
