

MINOR IN GEOLOGY

This program does not satisfy the academic requirements of the Association of Professional Geoscientists of Ontario.

Geology is a modern, dynamic and diverse science that involves investigating the composition and evolution of Earth and other planetary bodies.

Geologists and Earth scientists study the Earth, including its chemical, physical and biological evolution. Our programs teach students how to analyze Earth materials, probe the Earth from surface to core and model the processes that produced and shape its oceans and continents. The Ottawa region is a natural laboratory where students investigate resources (water, metals, minerals, petroleum), hazards (earthquakes, tsunamis, eruptions, landslides) and a variety of geological environments.

The Department of Earth and Environmental Sciences offers programs in geology and, along with the Department of Physics, a program in geology-physics. These programs balance field-based learning with theoretical and analytical investigations directly relevant to the needs of society. The final year involves an independent research project or equivalent units (credits) in advanced courses in the discipline.

The honours requirements meet the professional accreditation requirements of the Association of Professional Geoscientists of Ontario and l'Ordre des géologues du Québec.

This program is offered in English and in French.

Program Requirements

The table below includes only discipline-specific courses. Please refer to the Academic Regulations (<https://www.uottawa.ca/about-us/policies-regulations/academic-regulations/b-2-program-studies/>) for information on including a minor to your degree.

Requirements for this program have been modified. Please consult the 2018-2019 calendars (<https://catalogue.uottawa.ca/en/archives/>) for the previous requirements.

Compulsory courses at the 1000 level

CHM 1311	Principles of Chemistry	3 Units
GEO 1111	Introduction to Earth Systems	3 Units
GEO 1115	Introduction to Earth Materials	3 Units
MAT 1330	Calculus for the Life Sciences I	3 Units
PHY 1121	Fundamentals of Physics I	3 Units

Compulsory courses at the 2000 level

GEO 2163	Introduction to Mineralogy	3 Units
----------	----------------------------	---------

Optional courses

6 optional course units from:	6 Units
GEO 2020 Field Studies I	
GEO 2113 Paleontology	
GEO 2165 Stratigraphy and Sedimentation	
GEO 2321 Structural Geology and Tectonics	
GEO 2334 Quaternary Geology and Climate Change	
6 optional course units in geology (GEO) at the 3000 or 4000 level	6 Units

Total: 30 Units

Note(s)
