

MINOR IN SOCIAL SCIENCES OF HEALTH

This multidisciplinary minor is for students who want to explore health-related issues using the analytical lenses offered by the six disciplines that comprise the social sciences at the University – criminology, economics, political studies, psychology, social work and sociology. Indeed, each contributes to enriching students' understanding of the complex social factors that affect health.

Professors from each discipline draw from a wealth of social-science research that reveals key insights into why some people are healthier than others, and what contributes to health improvement. In addition, the program encourages students to engage in critical dialogue about the social, economic, political, psychological and cultural dimensions of health.

This program is offered in English and in French.

Program Requirements

The table below includes only discipline-specific courses. Please refer to the Academic Regulations (<https://www.uottawa.ca/about-us/policies-regulations/academic-regulations/b-2-program-studies/>) for information on including a minor to your degree.

Requirements for this program have been modified. Please consult the 2023-2024 calendars (<http://catalogue.uottawa.ca/en/archives/>) for the previous requirements.
