MASTER OF APPLIED SCIENCE ENVIRONMENTAL ENGINEERING

Summary

• Degree offered: Master of Applied Science (MASc)
• Registration status options: Full-time; Part-time
• Language of instruction: English

Most of the courses in this program are offered in English. Research activities can be conducted in English, French, or both, depending on the language used by the professor and the members of his or her research group.

• Program option (expected duration of the program):
  • within two years of full-time study
• Academic units: Faculty of Engineering (http://engineering.uottawa.ca/), Ottawa-Carleton Institute of Environmental Engineering (http://www.ociene.ca/).

Program Description

Ottawa-Carleton Joint Program

Established in 2000, the Ottawa-Carleton Institute of Environmental Engineering (OCIENE) combines the teaching and research strengths of the Department of Civil Engineering and the Department of Chemical Engineering at the University of Ottawa with that of the Departments of Civil and Environmental Engineering at Carleton University.

The Institute offers graduate programs leading to the degrees of Master of Applied Science in Environmental Engineering (MASc), a Master of Engineering (MEng) and Doctor of Philosophy (PhD) in Environmental Engineering.

Main Areas of Research

• Biofilms and biofilm technologies for water and wastewater treatment
• Drinking water: membrane treatment and climate change adaptation technologies
• Ecological engineering and agricultural waste management
• Mining impacted water management
• Northern, rural and First Nation water and wastewater
• Sustainable municipal waste management, groundwater, and remediation technologies
• Water resources and management

Note: Further information is posted on the departmental website.

Learning Outcomes

• Autonomy in conducting research
• Autonomy in preparing scholarly publications

Other Programs Offered Within the Same Discipline or in a Related Area

• Master of Applied Science Civil Engineering (MASc)
• Master of Applied Science Civil Engineering Specialization in Science, Society and Policy (MASc)
• Master of Engineering Environmental Engineering (MEng)
• Master of Engineering Civil Engineering (MEng)
• Doctorate in Philosophy Environmental Engineering (PhD)
• Doctorate in Philosophy Civil Engineering (PhD)

Fees and Funding

• Program fees:
  The estimated amount for university fees (https://www.uottawa.ca/university-fees/) associated with this program are available under the section Finance your studies (http://www.uottawa.ca/graduate-studies/programs-admission/finance-studies/).

  International students enrolled in a French-language program of study may be eligible for a differential tuition fee exemption (https://www.uottawa.ca/university-fees/differential-tuition-fee-exemption/).

  • To learn about possibilities for financing your graduate studies, consult the Awards and financial support (https://www.uottawa.ca/graduate-studies/students/awards/) section.

Notes

• Programs are governed by the general regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations/) in effect for graduate studies and by the general regulations of the Ottawa-Carleton Institute of Environmental Engineering (OCIENE).

• In accordance with the University of Ottawa regulation, students have the right to complete their assignments, examinations, research papers, and theses in French or in English.

Admission Requirements

For the most accurate and up to date information on application deadlines, language tests and other admission requirements, please visit the specific requirements (https://www.uottawa.ca/graduate-studies/programs-admission/apply/specifc-requirements/) webpage.

To be eligible, candidates must:

- Have one of the following:
  - An honours bachelor’s degree with a specialization or a major in environmental engineering (or equivalent) with a minimum average of 70% (B);
  - An honours bachelor’s degree with a specialization or a major in related engineering disciplines (civil, chemical, mechanical, etc.) with a minimum average of 70% (B);
  - An honours bachelor’s degree with specialization or a major in environmental science disciplines with a minimum average of 70% (B).

Note: International candidates must check the admission equivalencies (https://www.uottawa.ca/graduate-studies/international/study-uottawa/admission-equivalencies/) for the diploma they received in their country of origin.

- Demonstrate a good academic performance in previous studies as shown by official transcripts, research reports, abstracts or any other documents demonstrating research skills.
- Identify at least one professor who is willing to supervise your research and thesis.
  - We recommend that you contact potential thesis supervisors as soon as possible.
  - To register, you need to have been accepted by a thesis supervisor.
  - The supervisor’s name is required at the time of application.
- Meet the following additional requirements:
  - All students entering the program are required to have courses in mathematics, probability and statistics equivalent to courses required in undergraduate engineering programs.
  - All students entering the program are also required to have taken three undergraduate courses equivalent to the following University of Ottawa courses:
    - CHG 2312 or CVG 2116
    - CVG 2132
    - CVG 3132
    - These courses are considered to provide the minimum background in fluid mechanics, and in physical, chemical, and biochemical treatment principles, necessary to adequately follow environmental engineering courses at the graduate level. Depending on their background, students may have been exposed to these principles through a different combination of courses in their undergraduate curriculum. Students entering the program without an equivalent background in these topics are expected to take these courses early in their studies and they are considered additional to those normally required for the degree. The undergraduate courses required are specified in the certificate of admission.

### Language Requirements

Applicants must be able to understand and fluently speak the language of instruction (French or English) in the program to which they are applying. Proof of linguistic proficiency may be required.

Applicants whose first language is neither French nor English must provide proof of proficiency in the language of instruction.

Note: Candidates are responsible for any fees associated with the language tests.

### Notes

- The admission requirements listed above are minimum requirements and do not guarantee admission to the program.
- Admissions are governed by the general regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations/) in effect for graduate studies and by the general regulations of the Ottawa-Carleton Institute of Environmental Engineering (OCIENE).
- Research facilities are shared between the two campuses. Students have access to the professors, courses and facilities at both universities; however, the choice of research supervisor will determine the primary campus location of the student. It will also determine which university awards the degree.

### Program Requirements

#### Master’s with Thesis

Requirements for this program have been modified. Please consult the 2021-2022 calendars (http://catalogue.uottawa.ca/en/archives/) for the previous requirements.

The Department may require students to take additional courses, depending on their backgrounds.

Students must meet the following requirements:

#### Compulsory Courses:

<table>
<thead>
<tr>
<th>15 optional course units from the list of optional courses</th>
<th>15 Units</th>
</tr>
</thead>
</table>

**Seminar:**

| EVG 5800 Seminar for Master’s Candidates in Environmental Engineering | 1 Unit |

**Thesis:**

| THM 7999 Master’s Thesis | 3, 4 |

Note(s)

1. A minimum of 3 course units must be selected from at least three of the following areas of study:
   - Air pollution
   - Water resources management, groundwater management and contaminant transport
   - Water and wastewater treatment
   - Management of solid, hazardous, and radioactive waste and pollution prevention
   - Environmental impact assessment

2. This course involves the presentation of a seminar and regular attendance at the departmental seminar series.

3. Presentation and defense of a thesis based on original research carried out under the direct supervision of a research faculty member in the Department. The choice of the supervisor will determine the primary campus location of the student. It will also determine which university awards the degree.

4. Students are responsible for ensuring they have met all of the thesis requirements (http://www.uottawa.ca/graduate-studies/students/theses/).
List of Optional Courses

Course selection is subject to the approval of the advisor or the advisory committee. Students may choose courses offered at either university from among those listed below.

The courses listed below are grouped by area of study. Course descriptions may be found in the departmental sections of the calendars concerned.

Air Pollution
CHG 8132 Adsorption Separation Processes 3 Units
EYG 7101 Air Pollution Control 3 Units
EYG 7104 Indoor Environmental Quality 3 Units
EYG 7105 Atmospheric Aerosols 3 Units
EYG 7106 Atmospheric Chemical Transport Modelling 3 Units

Water Resources Management, Groundwater Management, and Contaminant Transport
CVG 5112 Computational Hydrodynamics 3 Units
CVG 5124 Coastal Engineering 3 Units
CVG 5160 Sediment Transport 3 Units
CVG 5162 River Hydraulics 3 Units
EYG 5125 Statistical Methods in Hydrology 3 Units
EYG 5182 Water Resources Management 3 Units
EYG 5183 Mixing and Transport in Water Bodies 3 Units
EYG 5301 Soil and Water Conservation Engineering 3 Units
EYG 7301 Contaminant Hydrology 3 Units
EYG 7303 Multiphase Flow in Soils 3 Units
GEO 5143 Environmental Isotopes and Groundwater Geochemistry 3 Units
GEO 5147 Aqueous Inorganic Geochemistry and Modelling 3 Units
GEO 5153 Computer Techniques in the Earth Sciences 3 Units

Management of Solid, Hazardous, and Radioactive Waste and Pollution Prevention
CVG 5314 Geotechnical Hazards 3 Units
EYG 5133 Solid Waste Management 3 Units
EYG 5179 Anaerobic Digestion 3 Units
EYG 5331 Sludge Utilization and Disposal 3 Units
EYG 7132 Sludge Treatment and Disposal 3 Units
EYG 7134 Resource Industry Waste Management 3 Units
EYG 7201 Geo-Environmental Engineering 3 Units

Water and Wastewater Treatment
EYG 5001 Biofilm Processes in Wastewater Treatment 3 Units
EYG 5130 Wastewater Treatment Process Design 3 Units
EYG 5132 Unit Operations of Water Treatment 3 Units
EYG 5134 Chemistry for Environmental Engineering 3 Units
EYG 5137 Water and Wastewater Treatment Process Analysis 3 Units
EYG 5138 Advanced Water Treatment 3 Units
EYG 5302 Decentralized Wastewater Management 3 Units
EYG 7144 Advanced Wastewater Treatment 3 Units
CHG 8192 Membranes in Clean Processes 3 Units

Environmental Impact Assessment
EYG 5193 Environmental Assessment of Civil Engineering Projects 3 Units
EYG 5212 Climate Change Impacts on Water Resources 3 Units
EYG 5333 Research Methodology 3 Units
EYG 7200 Climate Change and Engineering 3 Units
EYG 7206 Energy and Resources from waste 3 Units

Other Courses
CVG 7140 Statistics, Probabilities and Decision-Making 3 Units
CHG 8194 Membrane Liquid Separation Processes and Materials 3 Units
CHG 8195 Advanced Numerical Methods in Chemical and Biological Engineering 3 Units
CHG 8196 Interfacial Phenomena in Engineering 3 Units
EYG 6108 Directed Studies I 3 Units
EYG 6109 Directed Studies II 3 Units
EYG 6300 Special Topics in Environmental Engineering 3 Units
EYG 6301 Special Topics in Environmental Engineering 3 Units
EYG 6302 Special Topics in Environmental Engineering 3 Units
EYG 6303 Special Topics in Environmental Engineering 3 Units
EYG 6304 Special Topics in Environmental Engineering 3 Units
EYG 7001 Topics in Environmental Engineering 3 Units
EYG 7002 Topics in Environmental Engineering 3 Units
EYG 7003 Topics in Environmental Engineering 3 Units
EYG 7004 Topics in Environmental Engineering 3 Units
EYG 7005 Topics in Environmental Engineering 3 Units
GNG 5121 Taguchi methods for efficient Engineering RD 3 Units
GNG 5122 Operational Excellence and Lean Six Sigma 3 Units

Minimum Requirements
The passing grade in all courses is B.
Students who fail six units, or the thesis proposal, or whose research progress report is deemed unsatisfactory are required to withdraw from the program.

Fast-track from Master's to PhD
Students enrolled in the master's program in environmental engineering at the University of Ottawa may be eligible to fast-track directly into the doctoral program without writing a master's thesis. For additional information, please contact the graduate studies office of the Faculty of Engineering.

Research

Research Fields & Facilities
Located in the heart of Canada's capital, a few steps away from Parliament Hill, the University of Ottawa is among Canada's top 10 research universities.

uOttawa focuses research strengths and efforts in four Strategic Areas of Development in Research (SADRs):

- Canada and the World
- Health
- e-Society
- Molecular and Environmental Sciences

With cutting-edge research, our graduate students, researchers and educators strongly influence national and international priorities.

Research at the Faculty of Engineering

Areas of research:

- Environmental Engineering
- Chemical and Biological Engineering
- Civil Engineering
- Electrical Engineering and Computer Science
- Mechanical Engineering

For more information, refer to the list of faculty members and their research fields on Uniweb.

IMPORTANT: Candidates and students looking for professors to supervise their thesis or research project can also consult the website of the faculty or department (https://www.uottawa.ca/graduate-studies/students/academic-unit-contact-information/) of their program of choice. Uniweb does not list all professors authorized to supervise research projects at the University of Ottawa.

Courses

Course selection is subject to the approval of the advisor or the advisory committee. Students may choose courses offered at either university from among those listed below.

The courses listed below are grouped by area of study. Students must complete at least one course in each of the five areas. The director will decide when a course offered under a special topics or directed studies heading can be considered to meet the requirements of a given area. Course descriptions may be found in the departmental sections of the calendars concerned. Only a selection of courses given in a particular academic year.

**EVG 5001 Biofilm Processes in Wastewater Treatment (3 crédits / 3 units)**

Volet / Course Component: Cours magistral / Lecture

**EVG 5125 Statistical Methods in Hydrology (3 units)**

Concepts of probability and random variables applied to hydrology. Statistical distributions, their approximation and analysis. Statistical inference, including tests of significance and estimation theory. Linear and multivariate correlation and regression techniques. Data generation and simulation techniques for design of water-resource systems. Introduction to hydrologic and meteorologic time series. This course is equivalent to CIVJ 5601 at Carleton University.

Course Component: Lecture

**EVG 5130 Wastewater Treatment Process Design (3 units)**

The physical, chemical and biological processes involved in the treatment of domestic and industrial wastes. Waste characteristics, stream assimilation, biological oxidation, aeration, sedimentation, anaerobic digestion, sludge disposal. This course is equivalent to ENVJ 5900 at Carleton University.

Course Component: Lecture

Previously CVG 5130.

**EVG 5132 Unit Operations of Water Treatment (3 units)**

Unit operations and unit processes involved in the treatment of a water supply for various uses. Topics included are water quality, water microbiology, sedimentation, chemical treatment, disinfection, water chemistry, flocculation. This course is equivalent to ENVJ 5901 at Carleton University.

Course Component: Lecture

Previously CVG 5132.

**EVG 5133 Solid Waste Management (3 units)**

Collection and disposal of solid wastes. Sanitary landfill, composting, incineration and other methods of disposal. Material and energy recovery. This course is equivalent to ENVJ 5906 at Carleton University.

Course Component: Lecture

Previously CVG 5133.

**EVG 5134 Chemistry for Environmental Engineering (3 units)**

Scope, limitations and design procedures for water treatment processes for the removal of toxic and non-standard contaminants. Current water treatment problems and regulations, activated carbon treatment, ion exchange, disinfection practices and oxidation via advanced oxidation processes (ozonation and UV oxidation), iron and manganese removal, recent developments in coagulation, membranes, air stripping. This course is equivalent to ENVJ 5907 at Carleton University.

Course Component: Lecture

Previously CVG 5134.

**EVG 5135 Water and Wastewater Treatment Process Analysis (3 units)**

Mass balancing in complex systems. Reaction kinetics and kinetic data analysis: classical and computer based methods. Reactor design: ideal reactors and real reactors. Analysis of tracer tests. Interfacial mass transfer: common theories. Mass transfer models. This course is equivalent to ENVJ 5908 at Carleton University.

Course Component: Lecture

Previously CVG 5135.

**EVG 5138 Advanced Water Treatment (3 units)**

Scope, limitations and design procedures for water treatment processes for the removal of toxic and non-standard contaminants. Current water treatment problems and regulations, activated carbon treatment, ion exchange, disinfection practices and oxidation via advanced oxidation processes (ozonation and UV oxidation), iron and manganese removal, recent developments in coagulation, membranes, air stripping. This course is equivalent to ENVJ 5902 at Carleton University.

Course Component: Lecture

Previously CVG 5138.

**EVG 5139 Environmental Assessment of Civil Engineering Projects (3 units)**

Procedures and methods for systematic evaluation of the environmental impact of civil engineering projects including wastewater disposal systems, solid waste disposal systems, and water resource development systems. This course is equivalent to ENVJ 5700 at Carleton University.

Course Component: Lecture

Previously CVG 5139.
EVT 5179 Anaerobic Digestion (3 units)
Advanced theoretical, biological, and practical aspects of anaerobic digestion processes. Principles to be applied to the design and application of conventional and advanced anaerobic processes used for treatment of municipal and industrial wastewaters. Topics to include microbiology and biochemistry fundamentals, techniques for monitoring anaerobic digestion performance, municipal sludge stabilization, anaerobic composting, anoxic/anaerobic bioremediation, Andrew's dynamic model. Design of the following: two-phase digestion; Downflow Stationary Fixed Film (DSFF) reactors; Uplflow Anaerobic Sludge Blanket (UASB); Uplflow Blanket Filter (UBF) reactors; and Anaerobic Sequencing Batch Reactors (ASBR). This course is equivalent to ENVJ 5902 at Carleton University.

Course Component: Lecture
Previously CVG 5179.

EVT 5182 Water Resources Management (3 units)
Global water supply and demand; Integrated water resources management; Modeling and optimization of water resources systems; Reservoir Management; Uncertainty modeling; Climate Change and water; Decision under uncertainty.

Course Component: Lecture

EVT 5183 Mixing and Transport in Water Bodies (3 units)
Typical models for selected water resources systems: Rivers, lakes, estuaries; Water quality parameters; Conservative parameters; Non conservative parameters; Laminar and turbulent flows; Dispersion; Pollution sources; Modeling; Simplified (integral) models; Dilution models; Three Dimensional models; Advection-Diffusion Equation; Analytical solution; Numerical solution; Non-conservative transport and Multi-component systems; Modeling approaches based on conservative and non-conservative transport and kinetics; Certain water quality parameters (Temperature, Salinity, etc.).

Course Component: Lecture

EVT 5203 Hazardous and Radioactive Waste Management (3 units)
This course is equivalent to ENVE 5203 at Carleton University.

Course Component: Lecture

EVT 5212 Climate Change Impacts on Water Resources (3 units)
Spatiotemporal distribution of water and its impact on human activities, including domestic and municipal consumption, hydropower generation, rain-fed and irrigated agriculture, design and operation of sewer systems, floodplain zoning, navigation, etc. Critical assessment of methodologies for climate change impacts estimation. Theoretical knowledge and hands-on application experience needed to perform climate change analysis on a water resources system.

Course Component: Lecture

EVT 5301 Soil and Water Conservation Engineering (3 units)
The design, water quality and climate change impacts of soil and water conservation systems. Topics include: urban storm water management (including LID) erosion control practices, subsurface and surface drainage systems and irrigation technologies.

Course Component: Lecture

EVT 5302 Decentralized Wastewater Management (3 units)
This course covers fundamental principles and practical design applications of decentralized wastewater treatment for domestic and industrial sources. Topics include: management of decentralized wastewater systems, pre-treatment systems, soil infiltration systems, advanced onsite technologies, constructed wetlands, alternative collection systems, wastewater reuse and septage management.

Course Component: Lecture

EVT 5331 Sludge Utilization and Disposal (3 units)
Introduction to sludge processing technology and procedures to be used in the planning and design of sludge treatment processes. Evaluate the economics and performance of sludge unit process operations. Selection of methods for the final disposition of sludge. This course is equivalent to ENVJ 5902 at Carleton University.

Course Component: Lecture

EVT 5333 Research Methodology (3 units)
Key components and strategies required to build a robust scientific research program in environmental engineering including research questions, literature review, experiment design, data interpretation, scientific manuscripts, public speaking, ethics, and plagiarism.

Course Component: Lecture

EVT 5800 Seminar for Master's Candidates in Environmental Engineering (1 crédit)
Ce cours est équivalent à ENVE 5800 à la Carleton University.

Volet : Recherche

EVT 5801 Seminar for Doctoral Candidates in Environmental Engineering (3 crédits)
Ce cours est équivalent à ENVE 7800 à la Carleton University.

Volet : Recherche

EVT 6001 Projet en génie de l'environnement / Environmental Engineering Project (6 crédits / 6 units)
Ce cours est équivalent à ENVE 5900 à la Carleton University. / This course is equivalent to ENVE 5900 at Carleton University.

Volet / Course Component: Recherche / Research

EVT 6108 Directed Studies I (3 units)
This course is equivalent to ENVE 5906 at Carleton University.

Course Component: Research

EVT 6109 Directed Studies II (3 units)
This course is equivalent to ENVE 5907 at Carleton University.

Course Component: Research

EVT 6300 Special Topics in Environmental Engineering (3 units)

Course Component: Lecture

EVT 6301 Special Topics in Environmental Engineering (3 units)
This course is equivalent to ENVE 5701 at Carleton University.

Course Component: Lecture

EVT 6302 Special Topics in Environmental Engineering (3 units)
This course is equivalent to ENVE 5702 at Carleton University.

Course Component: Lecture

EVT 6303 Special Topics in Environmental Engineering (3 units)

Course Component: Lecture

EVT 6304 Special Topics in Environmental Engineering (3 units)

Course Component: Lecture

EVT 6508 Études dirigées I (3 crédits)
Volet : Cours magistral

EVT 6509 Études dirigées II (3 crédits)
Volet : Cours magistral

EVT 7001 Topics in Environmental Engineering (3 crédits / 3 units)
This course is equivalent to ENVE 5701 at Carleton University.

Volet / Course Component: Laboratoire / Laboratory, Cours magistral / Lecture

EVT 7002 Topics in Environmental Engineering (3 crédits / 3 units)
This course is equivalent to ENVE 5702 at Carleton University.

Volet / Course Component: Cours magistral / Lecture
