MASTER OF INTERDISCIPLINARY APPLIED ARTIFICIAL INTELLIGENCE (ONLINE)

Overview

Summary

• Degree offered: Master of Interdisciplinary Artificial Intelligence (MIAI)
• Registration status options: Part-time
• Language of instruction: English
• Program option (expected duration of the program): within two years
• Academic units: Faculty of Engineering (http://engineering.uottawa.ca/), School of Engineering Design and Teaching Innovation (https://www.uottawa.ca/faculty-engineering/).

Program Description

The Systems Science and Engineering programs offers an online Master of Interdisciplinary Applied Artificial Intelligence.

The program provides qualified students with the opportunity for master’s-level study in a broad range of areas that emphasize transdisciplinary work in the context of general systems analysis. The emphasis in Interdisciplinary Applied Artificial Intelligence is on the development of analytical and integration skills for use in the resolution of complex applied problems that require a broad-based perspective.

The graduate program in Interdisciplinary Artificial Intelligence is an interdisciplinary program specially designed for those who are interested in the analysis and modelling (mathematical and computer) of natural and man-made systems. It provides the professional with skills and knowledge required to understand, control, predict and optimize behaviour in a variety of fields from engineering and computer science to management.

In the program, students will:

1. Develop and demonstrate the ability to communicate with and integrate multi-disciplinary expertise related to system science.
2. Develop and demonstrate the ability to lead, design and manage large complex systems using current and emerging tools, techniques and applications of Artificial intelligence.
3. Develop skills in management, technology, communications, information architecture, data science, and gender / cultural awareness and demonstrate the ability to apply them in practice.

Other Programs Offered Within the Same Discipline or in a Related Area

• Graduate Diploma Systems Science and Engineering
• Master of Science Systems Science and Engineering (MCS)
• Master of Systems Science and Engineering

Fees and Funding

• Program fees:
  • The estimated amount for university fees (https://www.uottawa.ca/university-fees/) associated with this program are available under the section Finance your studies (http://www.uottawa.ca/graduate-studies/programs-admission/finance-studies/).
  • International students enrolled in a French-language program of study may be eligible for a differential tuition fee exemption (https://www.uottawa.ca/university-fees/differential-tuition-fee-exemption/).
  • To learn about possibilities for financing your graduate studies, consult the Awards and financial support (https://www.uottawa.ca/graduate-studies/students/awards/) section.

Notes

• Programs are governed by the general regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations/) in effect for graduate studies at the University of Ottawa.
• In accordance with the University of Ottawa regulation, students have the right to complete their assignments, examinations, research papers, and theses in French or in English.

Admission Requirements

For the most accurate and up to date information on application deadlines, language tests and other admission requirements, please visit the specific requirements (https://www.uottawa.ca/graduate-studies/programs-admission/apply/specfic-requirements/) webpage.

To be eligible, candidates must:

• Have a bachelor’s degree with a specialization or major in engineering, business, science, math, technology or statistics (or equivalent) with a minimum admission average of 70% (B).
Undergraduate courses in probability, linear algebra, differential equations and computer programming are prerequisites for the core courses of the program.

• A minimum 2 years of experience and demonstrated proficiency in English are required.

• Students are responsible for having their own computers and a broadband connection to the Internet sufficient for videoconferencing.

Language Requirements
Most courses are delivered in English as the international language for advanced information technology. However, the program will provide an appropriately supportive environment for francophone students to develop professional competence in technical English at their own pace. Students have the right, as stipulated in the University’s bilingualism regulations (Academic Regulations I-2), to complete all their work, including their thesis, in the official language of their choice (French or English). There are fully bilingual professors and advisors who can support students in French.

Applicants whose first language is neither French nor English must provide proof of proficiency in the language of instruction through one of the following two requirements or one of the language tests below.

• Proof of completion within the last five years, of a previous degree program in an English language university.

• Proof of recent prolonged residence and exercise of a profession in an English speaking country (normally at least four years over the last six years).

Language tests recognized by the University of Ottawa:

• TOEFL minimum score of 600 (paper-based) with a minimum score of 50 on the written and 50 on the spoken or a minimum score of 100 (internet-based).

• IELTS minimum score of 7 for 3 of the 4 tests (Reading, Listening, Writing, Speaking) and a minimum score of 6 in the fourth test.

• A score of at least 14 on the CANTEST, with no individual test score below 4.0, along with a minimum score of 4.5 on the oral component of the test.

Note:

• Candidates are responsible for any fees associated with the language tests.

• Test scores cannot be more than two-years-old as of September 1 of the year of potential entry into the program.

Notes

• The admission requirements listed above are minimum requirements and do not guarantee admission to the program.

• Admissions are governed by the general regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations/) in effect for graduate studies.

Program Requirements

Master’s
To receive the Master of Interdisciplinary Applied Artificial Intelligence – Online, a student enrolled in the program must successfully complete 30 course units of academic work: 12 compulsory units and 18 optional course units.

Requirements for this program have been modified. Please consult the 2023-2024 calendars (http://catalogue.uottawa.ca/en/archives/) for the previous requirements.

Students must meet the following requirements:

Compulsory Courses:

Research

Research Fields & Facilities
Located in the heart of Canada’s capital, a few steps away from Parliament Hill, the University of Ottawa is among Canada’s top 10 research universities.

uOttawa focuses research strengths and efforts in four Strategic Areas of Development in Research (SADRs):
Research at the Faculty of Engineering
Areas of research:

- Chemical and Biological Engineering
- Civil Engineering
- Electrical Engineering and Computer Science
- Mechanical Engineering

For more information, refer to the list of faculty members and their research fields on Uniweb.

IMPORTANT: Candidates and students looking for professors to supervise their thesis or research project can also consult the website of the faculty or department (https://www.uottawa.ca/graduate-studies/students/academic-unit-contact-information/) of their program of choice. Uniweb does not list all professors authorized to supervise research projects at the University of Ottawa.

Courses

MIA 5100 Foundations and Applications of Machine Learning (3 units)
The capabilities and limitations of machine learning: problem formulation; supervised and unsupervised learning techniques; deploying, monitoring, and evaluating machine learning models; storytelling and assessing the results of learning; current advances in application areas such as business, law, arts, social sciences and education. Recommended prerequisite: Aptitude for analytics. Although no specific programming background is required, students should be comfortable with computing technologies.

Course Component: Lecture
Courses CSI 5155, DTO 5100, DTO 5101, ELG 5255, IAI 5100, IAI 5101, MIA 5100, SYS 5185 cannot be combined for units.

MIA 5110 Foundations of modeling and simulation (3 units)

Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

MIA 5126 Essential Concepts in Data Science (3 units)
An introduction to the foundations of data science using a case study approach; overview of the data science process: types of tasks and models, data manipulation, exploratory data analysis, data summarization and data visualization; predictive modeling, descriptive modeling; reporting and deployment.

Course Component: Lecture
The courses MIA 5126,CSI 4142, DTI 5125, DTI 5126, MAT 4373 cannot be combined for units.
