MASTER OF SYSTEMS SCIENCE AND ENGINEERING

Overview

* Please note that the former title of this program was: Master of Systems Science.

Summary

• Degree offered: Master of Systems Science and Engineering (MSysScEng)
• Registration status options: Full-time; Part-time
• Language of instruction:
  • English
• Program option (expected duration of the program):
  • within two years of full-time study
• For immigration purposes, the summer term (May to August) for this program is considered a regularly scheduled break approved by the University. Students should resume full-time studies in September.
• Academic units: Faculty of Engineering (https://engineering.uottawa.ca/), Telfer School of Management, (http://www.telfer.uottawa.ca/en/prospective-students/interdisciplinary-programs/)Department of Mathematics and Statistics (http://science.uottawa.ca/mathstat/en/), Department of Economics (https://socialsciences.uottawa.ca/economics/)

Program Description

The Systems Science and Engineering program provides qualified students with the opportunity for master’s-level study in a broad range of areas that emphasize transdisciplinary work in the context of general systems analysis. The emphasis in Systems Science and Engineering is on the development of analytical and integration skills for use in the resolution of complex applied problems that require a broad-based perspective.

Many professors in Information Technology and Engineering, Mathematics and Statistics, Administration, Economics, and other disciplines are active in the Systems Science and Engineering program as instructors, student advisers and thesis directors. Others are interested in ongoing Systems Science and Engineering activities including the seminar series, and Systems Science and Engineering applications days.

The graduate program in System Science is an interdisciplinary program specially designed for those who are interested in the analysis and modelling (mathematical and computer) of natural and man-made systems. It provides the professional with skills and knowledge required to understand, control, predict and optimize behaviour in a variety of fields from engineering and computer science to management and applied economics. The program is supervised by a Committee composed of representatives from the Department of Economics, the School of Information Technology and Engineering, the Telfer School of Management, and the Department of Mathematics and Statistics.

To accommodate part-time students, the core courses are usually offered in the late afternoon or evening.

Main Areas of Research

Their areas of research, both theoretical and applied, span a wide variety of fields:

• Operations research
• Deterministic and probabilistic modelling
• Optimization
• Computer science
• Information systems
• Control
• Economic modelling

Other Programs Offered Within the Same Discipline or in a Related Area

• Graduate Diploma Systems Science and Engineering
• Master of Science Systems Science and Engineering (MSc)

Fees and Funding

• Program fees:

  The estimated amount for university fees (https://www.uottawa.ca/university-fees/) associated with this program are available under the section Finance your studies (http://www.uottawa.ca/graduate-studies/programs-admission/finance-studies/).

  International students enrolled in a French-language program of study may be eligible for a differential tuition fee exemption (https://www.uottawa.ca/university-fees/differential-tuition-fee-exemption/).

  • To learn about possibilities for financing your graduate studies, consult the Awards and financial support (https://www.uottawa.ca/graduate-studies/students/awards/) section.

Notes

• Programs are governed by the academic regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations/) in effect for graduate studies.

• In accordance with the University of Ottawa regulation, students have the right to complete their assignments, examinations, research papers, and theses in French or in English. Research activities can be conducted either in English, French or both, depending on the language used by the professor and the members of his or her research group.

Admission Requirements
For the most accurate and up to date information on application deadlines, language tests and other admission requirements, please visit the specific requirements (https://www.uottawa.ca/graduate-studies/programs-admission/apply/specific-requirements/) webpage.

To be eligible, candidates must:

- Have a bachelor’s degree in Computer Science, Economics, Engineering, Mathematics, Operations Research, Science or a related area with a minimum average of B (70%).

Note: International candidates must check the admission equivalencies (https://www.uottawa.ca/graduate-studies/international/study-uottawa/admission-equivalencies/) for the diploma they received in their country of origin.

- Undergraduate courses in probability, linear algebra, differential equations and computer programming are prerequisites for the core courses of the Program. Details regarding the level and content of prerequisite courses are included in the information package which is sent to all applicants. If a student lacks any of these courses, he will normally be required to complete them as a condition of admission. Entering students who lack the required undergraduate preparation may be permitted to enter a qualifying program.

Language Requirements
Applicants must be able to understand and fluently speak the language of instruction (French or English) in the program to which they are applying. Proof of linguistic proficiency may be required.

Applicants whose first language is neither French nor English must provide proof of proficiency in the language of instruction.

Note: Candidates are responsible for any fees associated with the language tests.

Notes

- The admission requirements listed above are minimum requirements and do not guarantee admission to the program.
- Admissions are governed by the academic regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations/) in effect for graduate studies.
- No equivalencies or advanced standing are granted. A student who has already successfully completed some of the compulsory units, may be allowed to replace those units with elective units. For details, see the general regulations in effect for graduate studies, section B 2.7 c).
- Candidates must clearly select the program without thesis on their application form.

Program Requirements
Requirements for this program have been modified. Please consult the 2023-2024 (https://catalogue.uottawa.ca/en/archives/) calendar (https://catalogue.uottawa.ca/en/archives/) for the previous requirements.

Master’s with Coursework
To receive this Master’s degree, a student enrolled in the program must successfully complete 30 course units.

Students must meet the following requirements:

¹ List of Optional Courses

ADM 6260  Project Management I  1.5 Units
ADM 6261  Project Management II  1.5 Units
CSI 5122  Software Usability  3 Units
DTI 5175  Mobile Commerce Technologies  3 Units
DTI 5380  Systems and Architectures for Electronic Commerce  3 Units
DTI 6130  Web Services  1.5 Units
DTI 6160  Cyber Security Systems and Strategies  3 Units
DTI 6230  Business Process Management and Performance Measurement  3 Units
ECO 6143  Economics of Natural Resources  3 Units
ELG 5103  Optical Communications Systems  3 Units
ELG 5119  Stochastic Processes  3 Units
ELG 5170  Information Theory  3 Units
ELG 5375  Digital Communications  3 Units
ELG 5376  Digital Signal Processing  3 Units
ELG 5378  Image Processing and Image Communications  3 Units
EMP 5116  Issues in Management and Operation of Communication Networks  3 Units
EMP 5120  Product Development and Management  3 Units
GNG 5100  Introduction to Engineering Management  3 Units
GNG 5120  Technology entrepreneurship for Engineers and Computer Scientists  3 Units
GNG 5121  Taguchi methods for efficient Engineering RD  3 Units
GNG 5122  Operational Excellence and Lean Six Sigma  3 Units
GNG 5123  Enterprise Architecture  3 Units
GNG 5124  Internet Technologies and Mobile Commerce  3 Units
GNG 5125  Data Science Applications  3 Units

GNG 5130 Communication and Influence for Engineers 3 Units
GNG 5131 Sales and Influence for Engineers 3 Units
GNG 5140 Engineering Design 3 Units
GNG 5141 Creativity and Innovation 3 Units
GNG 5231 Sales Engineer Internship Project 6 Units
GNG 5300 Topics in Engineering 3 Units
GNG 5301 Professional Skills and Responsibility 3 Units
GNG 5310 Topics in Industry Practice 3 Units
GNG 5902 Industry Internship Project 6 Units
IAI 5101 Foundations of Machine Learning for Scientists and Engineers 3 Units
IAI 5130 Ethics for Design, AI and Robotics 3 Units
MCG 5169 Advanced Topics in Reliability Engineering 3 Units
SYS 5111 Foundations and Applications of Machine Learning 3 Units
SYS 5122 Essential Concepts in Data Science 3 Units
SYS 5295 Ethics for Design, AI, and Robotics 3 Units

Research
Research Fields & Facilities
Located in the heart of Canada’s capital, a few steps away from Parliament Hill, the University of Ottawa is among Canada’s top 10 research universities.

UOttawa focuses research strengths and efforts in four Strategic Areas of Development in Research (SADRs):

- Canada and the World
- Health
- e-Society
- Molecular and Environmental Sciences

With cutting-edge research, our graduate students, researchers and educators strongly influence national and international priorities.

Research at the Faculty of Engineering
Areas of research:

- Chemical and Biological Engineering
- Civil Engineering
- Electrical Engineering and Computer Science
- Mechanical Engineering

For more information, refer to the list of faculty members and their research fields on Uniweb.

IMPORTANT: Candidates and students looking for professors to supervise their thesis or research project can also consult the website of the faculty or department (https://www.uottawa.ca/graduate-studies/students/academic-unit-contact-information/) or their program of choice. Uniweb does not list all professors authorized to supervise research projects at the University of Ottawa.

Courses
SYS 5100 Systems Engineering (3 units)
Controllability and observability, Euler-Lagrange equations, Pontryagin maximum principle, dynamic programming, linear quadratic regulator problem, matrix Ricatti differential equations and properties of their solution, design of optimal regulator based on steady state solution of the Ricatti differential equation, time optimal control, LaSalle bang-bang principle, applications to motor speed control, satellite attitude control, etc.

Course Component: Laboratory, Lecture, Tutorial
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5110 Foundation of Modelling and Simulation (3 units)

Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5111 Foundations and Applications of Machine Learning (3 units)
The capabilities and limitations of machine learning; problem formulation; supervised and unsupervised learning techniques; deploying, monitoring, and evaluating machine learning models; storytelling and assessing the results of learning; current advances in application areas such as business, law, arts, social sciences and education.

Course Component: Lecture
The courses CSI 4145, CSI 5155, ELG 5255, IAI 5100, SYS 5111 cannot be combined for units.

SYS 5120 Applied Probability (3 units)
An introduction to stochastic processes, with emphasis on regenerative phenomena. Review of limit theorems and conditioning. The Poisson process. Renewal theory and limit theorems for regenerative processes; Discrete-time and continuous-time Markov processes with countable state space. Applications to queuing.

Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5122 Essential Concepts in Data Science (3 units)
An introduction to the foundations of data science using a case study approach; overview of the data science process: types of tasks and models, data manipulation, exploratory data analysis, data summarization and data visualization; predictive modeling, descriptive modeling; reporting and deployment.

Course Component: Lecture
The courses CSI 4142, DTI 5125, DTI 5126, MAT 4373, SYS 5122 cannot be combined for units.

SYS 5130 Systems Optimization and Management (3 units)
Analysis of user requirements and model design. Data mining. Use of optimization software. Systems thinking and its application to economic systems and hierarchical systems. Applications to economic systems simulation, modeling, optimization and management.

Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.
SYS 5140 Economic System Design (3 units)
Introduction to the epistemology of systems thinking and its application to economic systems. Basic concepts of complex systems thinking including hierarchical systems and economic systems simulation and behaviour. Soft systems thinking. Examples from other fields of application will be reviewed from an interdisciplinary perspective.
Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5160 Systems Integration (3 units)
Course Component: Lecture
Prerequisites: 6 course units from SYS 5100, SYS 5110, SYS 5120, SYS 5130, SYS 5140.

SYS 5170 Essential Concepts in Data Science (3 units)
An introduction to the foundations of data science using a case study approach; overview of the data science process: types of tasks and models, data manipulation, exploratory data analysis, data summarization and data visualization; predictive modeling, descriptive modeling; reporting and deployment.
Course Component: Lecture
The courses CSI 4142, DTI 5125, DTI 5126, MAT 4373, IAI 5120 and SYS 5170 cannot be combined for units.

SYS 5180 Mathematics for Artificial Intelligence (3 units)
Course Component: Lecture

SYS 5185 Foundations and Applications of Machine Learning (3 units)
The capabilities and limitations of machine learning; problem formulation; supervised and unsupervised learning techniques; deploying, monitoring, and evaluating machine learning models; storytelling and assessing the results of learning; current advances in application areas such as business, law, arts, social sciences and education.
Course Component: Lecture
The courses CSI 5155, ELG 5255, IAI 5100, IAI 5101, MIA 5100 and SYS 5185 cannot be combined for units.

SYS 5190 Directed Readings in Systems Science (3 units)
Directed Readings in Systems Science
Course Component: Research
Courses SYS 5190, SYS 5975 cannot be combined for units.

SYS 5295 Ethics for Design, AI, and Robotics (3 units)
The interplay between Artificial Intelligence, society, the law, and ethics; the course will explore how advances in Artificial Intelligence affect the law and other social institutions, and, conversely, how societal, legal, and ethical considerations affect the development and deployment of Artificial Intelligence technologies.
Course Component: Lecture
The courses CSI 5195, DTI 5310, ELG 5295, IAI 5130 and SYS 5295 cannot be combined for units.
