MASTER OF SYSTEMS SCIENCE AND ENGINEERING

Overview

Summary

- Degree offered: Master of Systems Science and Engineering (MSysScEng)
- Registration status options: Full-time; Part-time
- Language of instruction:
  - English
- Program option (expected duration of the program):
  - within two years of full-time study
- For immigration purposes, the summer term (May to August) for this program is considered a regularly scheduled break approved by the University. Students should resume full-time studies in September.

Program Description

The Systems Science and Engineering program provides qualified students with the opportunity for master's-level study in a broad range of areas that emphasize transdisciplinary work in the context of general systems analysis. The emphasis in Systems Science and Engineering is on the development of analytical and integration skills for use in the resolution of complex applied problems that require a broad-based perspective.

Many professors in Information Technology and Engineering, Mathematics and Statistics, Administration, Economics, and other disciplines are active in the Systems Science and Engineering program as instructors, student advisers and thesis directors. Others are interested in ongoing Systems Science and Engineering activities including the seminar series, and Systems Science and Engineering applications days.

The graduate program in System Science is an interdisciplinary program specially designed for those who are interested in the analysis and modelling (mathematical and computer) of natural and man-made systems. It provides the professional with skills and knowledge required to understand, control, predict and optimize behaviour in a variety of fields from engineering and computer science to management and applied economics. The program is supervised by a Committee composed of representatives from the Department of Economics, the School of Information Technology and Engineering, the Telfer School of Management, and the Department of Mathematics and Statistics.

To accommodate part-time students, the core courses are usually offered in the late afternoon or evening.

Main Areas of Research

Their areas of research, both theoretical and applied, span a wide variety of fields:

- Operations research
- Deterministic and probabilistic modelling
- Optimization
- Computer science
- Information systems
- Control
- Economic modelling

Other Programs Offered Within the Same Discipline or in a Related Area

- Graduate Diploma Systems Science and Engineering
- Master of Science Systems Science and Engineering (MSc)
- Master of Science Systems Science and Engineering Specialization in Environmental Sustainability (MSc)

Fees and Funding

- Program fees:

  The estimated amount for university fees (https://www.uottawa.ca/university-fees/) associated with this program are available under the section Finance your studies (http://www.uottawa.ca/graduate-studies/programs-admission/finance-studies/).

  International students enrolled in a French-language program of study may be eligible for a differential tuition fee exemption (https://www.uottawa.ca/university-fees/differential-tuition-fee-exemption/).

  To learn about possibilities for financing your graduate studies, consult the Awards and financial support (https://www.uottawa.ca/graduate-studies/students/awards/) section.

Notes

- Programs are governed by the academic regulations (http://www.uottawa.ca/graduate-studies/students/general-regulations/) in effect for graduate studies.

- In accordance with the University of Ottawa regulation, students have the right to complete their assignments, examinations, research papers, and theses in French or in English. Research activities can be conducted either in English, French or both, depending on the language used by the professor and the members of his or her research group.

Admission Requirements
For the most accurate and up to date information on application
deadlines, language tests and other admission requirements, please visit
the specific requirements (https://www.uottawa.ca/graduate-studies/
programs-admission/apply/specific-requirements/) webpage.

To be eligible, candidates must:
• Have a bachelor’s degree in Computer Science, Economics,
  Engineering, Mathematics, Operations Research, Science or a related
  area with a minimum average of B (70%).

Note: International candidates must check the admission equivalencies
(https://www.uottawa.ca/graduate-studies/international/study-uottawa/
admission-equivalencies/) for the diploma they received in their country
of origin.

• Undergraduate courses in probability, linear algebra, differential
  equations and computer programming are prerequisites for the core
  courses of the Program. Details regarding the level and content of
  prerequisite courses are included in the information package which is
  sent to all applicants. If a student lacks any of these courses, he will
  normally be required to complete them as a condition of admission.
  Entering students who lack the required undergraduate preparation
  may be permitted to enter a qualifying program.

Language Requirements
Applicants must be able to understand and fluently speak the language
of instruction (French or English) in the program to which they are
applying. Proof of linguistic proficiency may be required.

Applicants whose first language is neither French nor English must
provide proof of proficiency in the language of instruction.

Note: Candidates are responsible for any fees associated with the
language tests.

Notes
• The admission requirements listed above are minimum requirements
  and do not guarantee admission to the program.
• Admissions are governed by the academic regulations (http://
  www.uottawa.ca/graduate-studies/students/general-regulations/) in
  effect for graduate studies.
• No equivalencies or advanced standing are granted. A student who
  has already successfully completed some of the compulsory units,
  may be allowed to replace those units with elective units. For details,
  see the general regulations in effect for graduate studies, section B
  2.7 c).
• Candidates must clearly select the program without thesis on their
  application form.

Program Requirements
Master’s with Coursework
Students must meet the following requirements:

<table>
<thead>
<tr>
<th>Compulsory Course:</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>SYS 5160</td>
<td>Systems Integration</td>
</tr>
<tr>
<td></td>
<td>12 course units from:</td>

</table>

Optional Courses:
15 optional course units from the list of optional courses 2 15 Units

List of Optional Courses
ADM 6260 Project Management I 1.5 Units
ADM 6261 Project Management II 1.5 Units
CSI 5122 Software Usability 3 Units
DTI 5175 Mobile Commerce Technologies 3 Units
DTI 5380 Systems and Architectures for Electronic Commerce 3 Units
DTI 6130 Web Services 1.5 Units
DTI 6160 Cyber Security Systems and Strategies 3 Units
DTI 6230 Business Process Management and Performance Measurement 3 Units
ECO 6143 Economics of Natural Resources 3 Units
ELG 5103 Optical Communications Systems 3 Units
ELG 5119 Stochastic Processes 3 Units
ELG 5170 Information Theory 3 Units
ELG 5375 Digital Communications 3 Units
ELG 5376 Digital Signal Processing 3 Units
ELG 5378 Image Processing and Image Communications 3 Units
EMP 5116 Issues in Management and Operation of Communication Networks 3 Units
EMP 5120 Product Development and Management 3 Units
GNG 5100 Introduction to Engineering Management 3 Units
GNG 5120 Technology entrepreneurship for Engineers and Computer Scientists 3 Units
GNG 5121 Taguchi methods for efficient Engineering RD 3 Units
GNG 5122 Operational Excellence and Lean Six Sigma 3 Units
GNG 5123 Enterprise Architecture 3 Units
GNG 5124 Internet Technologies and Mobile Commerce 3 Units
GNG 5125 Data Science Applications 3 Units
GNG 5130 Communication and Influence for Engineers 3 Units
GNG 5131 Sales and Influence for Engineers 3 Units
GNG 5140 Engineering Design 3 Units
GNG 5141 Creativity and Innovation 3 Units
GNG 5231 Sales Engineer Internship Project 6 Units
GNG 5300 Topics in Engineering 3 Units
GNG 5301 Professional Development Workshops 3 Units
GNG 5310 Topics in Industry Practice 3 Units
GNG 5902 Industry Internship Project 6 Units
MCG 5169 Advanced Topics in Reliability Engineering 3 Units

Note(s)
Students enrolled in the Master’s who have successfully completed
the core courses (15 units) and who are not continuing in the
Program, may be awarded the Graduate Diploma in Systems Science
and Engineering.

A maximum of 9 course units may be taken from Engineering (GNG) courses at the 5000 level. Consult the department for the list of elective courses and for the regulations governing the selection of these courses.

Research
Research Fields & Facilities
Located in the heart of Canada's capital, a few steps away from Parliament Hill, the University of Ottawa is among Canada’s top 10 research universities.

uOttawa focuses research strengths and efforts in four Strategic Areas of Development in Research (SADRs):

- Canada and the World
- Health
- e-Society
- Molecular and Environmental Sciences

With cutting-edge research, our graduate students, researchers and educators strongly influence national and international priorities.

Research at the Faculty of Engineering
Areas of research:

- Chemical and Biological Engineering
- Civil Engineering
- Electrical Engineering and Computer Science
- Mechanical Engineering

For more information, refer to the list of faculty members and their research fields on Uniweb.

IMPORTANT: Candidates and students looking for professors to supervise their thesis or research project can also consult the website of the faculty or department (https://www.uottawa.ca/graduate-studies/students/academic-unit-contact-information/) of their program of choice.

Uniweb does not list all professors authorized to supervise research projects at the University of Ottawa.

Courses
SYS 5100 Systems Engineering (3 units)
Controllability and observability, Euler-Lagrange equations, Pontryagin maximum principle, dynamic programming, linear quadratic regulator problem, matrix Ricatti differential equations and properties of their solution, design of optimal regulator based on steady state solution of the Ricatti differential equation, time optimal control, LaSalle bang-bang principle, applications to motor speed control, satellite attitude control, etc.

Course Component: Laboratory, Lecture, Tutorial
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5110 Foundation of Modelling and Simulation (3 units)

Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5120 Applied Probability (3 units)
An introduction to stochastic processes, with emphasis on regenerative phenomena. Review of limit theorems and conditioning. The Poisson process. Renewal theory and limit theorems for regenerative processes; Discrete-time and continuous-time Markov processes with countable state space. Applications to queuing.

Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5130 Systems Optimization and Management (3 units)
Analysis of user requirements and model design. Data mining. Use of optimization software. Systems thinking and its application to economic systems and hierarchical systems. Applications to economic systems simulation, modeling, optimization and management.

Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5140 Economic System Design (3 units)
Introduction to the epistemology of systems thinking and its application to economic systems. Basic concepts of complex systems thinking including hierarchical systems and economic systems simulation and behaviour. Soft systems thinking. Examples from other fields of application will be reviewed from an interdisciplinary perspective.

Course Component: Lecture
The following courses are recommended as prerequisites: CSI 1100, MAT 2341, (MAT 2324 or MAT 2331), MAT 2371, MAT 2375.

SYS 5160 Systems Integration (3 units)

Course Component: Lecture
Prerequisites: 6 course units from SYS 5100, SYS 5110, SYS 5120, SYS 5130, SYS 5140.

SYS 5190 Directed Readings in Systems Science (3 units)
Directed Readings in Systems Science

Course Component: Research
Courses SYS 5190, SYS 5975 cannot be combined for units.

SYS 5975 Projet en science des systèmes / Project in Systems Science
(6 crédits / 6 units)

Volet / Course Component: Recherche / Research
Les cours SYS 5190, SYS 5975 ne peuvent être combinés pour l'obtention de crédits. / Courses SYS 5190, SYS 5975 cannot be combined for units.

SYS 7990 Proposition de thèse de maîtrise / Master Thesis Proposal
Volet / Course Component: Recherche / Research
