HONOURS BACHELOR OF HEALTH SCIENCES - POPULATION AND PUBLIC HEALTH OPTION AND MASTER OF HEALTH SCIENCES PHYSIOTHERAPY

Overview
Honours Bachelor of Health Sciences - Population and Public Health Option

This program is offered in French.

The Honours Bachelor of Health Sciences program is defined by its integrative approach for studying health. Students are provided with a biosciences background, knowledge of quantitative and qualitative methodologies, along with an interdisciplinary approach to study the determinants of health. This unique academic program allows students to discover innovative ways to examine, measure and unravel complex health problems at all life stages, in Canada and around the world.

The Population and Public Health option will further students’ interdisciplinary health sciences training grounded in population health and public health theories and methodologies that remain the foundation of Canada’s healthcare system. Students will appraise health scenarios from local and global perspectives, critique health frameworks, develop health interventions including health promotion strategies, distinguish structural and systemic causes of health disparities, and evaluate contributions of intersectoral collaborations in health.

Graduates will be well-prepared to undertake health-related MSc programs or pursue careers in public or private health agencies, non-governmental health organizations or in community health programs. Students are provided with the necessary foundation further studies in medicine, rehabilitation studies, dentistry or pharmacy. Our interdisciplinary focus enhances the quality and maturity of future clinicians and health professionals.

Master of Health Sciences Physiotherapy

This program is offered in French.

Physiotherapy is a self-governing profession that promotes fitness, health and wellness. The profession provides frontline client-centered healthcare services to help clients maintain and improve their functional independence; and prevent and manage pain, physical limitations, disabilities, and limits to participation in their activities (Canadian Physiotherapy Association, 2000). The goal of the physiotherapy program is to train bilingual physiotherapists who can serve francophone clients in Ontario and French-speaking communities across Canada and to foster excellence in research and teaching.

The program supports a client-centered approach and focuses on integrating evidence-based results from research on clinical decision-making. The conceptual framework of the program is based on the human movement sciences (kinesiology and pathokinesiology) and the clinical sciences and incorporates the International Classification of Functioning, Disability and Health (ICF) framework as the standard for describing and measuring health and disability.

The MHS in Physiotherapy program runs over six consecutive terms, i.e., two years of full-time study. Students must complete 60 course units and 1,025 placement hours. These mandatory placements can take place in Ottawa-area hospitals, schools and rehabilitation centres or at locations outside the National Capital Region.

The program follows the national physiotherapy curriculum guidelines established by the Canadian Council of Physiotherapy University Programs. Upon completing their education, graduates who wish to register with the College of Physiotherapists of Ontario must successfully complete the Canadian physiotherapy competency examination (Canadian Alliance of Physiotherapy Regulators).

Since the mission of the physiotherapy program is to train bilingual professionals able to serve Francophone populations, the program is only offered in French. However, assignments and exams can be written in either French or English. While French is the language of instruction, some clinical placements, however, take place in French, Bilingual and English settings. Students must therefore have a working knowledge of English.

Optional courses
3 optional course units in health sciences from the list of optional courses  3 Units
6 science optional course units offered by the Faculty of Science  6 Units

Total:  90 Units

Note(s)
A maximum of 42 course units at the 1000 level is permitted.

Master of Health Sciences Physiotherapy

Master’s with Coursework

Compulsory Courses:
PHT 5512  Anatomie fonctionnelle du système musculo-squelettique  3 Units
PHT 5513  Biomécanique clinique  3 Units
PHT 5614  Évaluations et interventions de base en musculo-squelettique  4.5 Units
PHT 5621  Douleur, agents physiques et modalités thérapeutiques  4.5 Units
PHT 5622  Fondements de la pratique au niveau du système musculo-squelettique  4.5 Units
PHT 5623  Évaluation, diagnostic et intervention au niveau du système musculo-squelettique  4.5 Units
PHT 5631  Fondements et pratiques au niveau du système cardiorespiratoire  6 Units
REA 5703  Pratiques professionnelles en réadaptation  3 Units
PHT 6511  Évaluation et intervention auprès de personnes ayant des affections multiples I  2.5 Units
PHT 6531  Évaluation et intervention auprès de personnes ayant des affections multiples II  2 Units
PHT 6532  Pratique clinique et enjeux professionnels  3 Units
PHT 6533  Outils diagnostiques spécialisés en physiothérapie  3 Units
PHT 6612  Fondements neurobiologiques du mouvement humain  6 Units
PHT 6613  Évaluation, diagnostic et intervention au niveau du système neurologique  4.5 Units
REA 6503  Pratique factuelle en réadaptation  3 Units

Seminar:
PHT 6753  Séminaire de recherche  3 Units

Clinical Placements:

Clinical Placements:

PHT 5901  Stage I
PHT 5902  Stage II
PHT 6903  Stage III
PHT 6904  Stage IV
PHT 6905  Stage V
PHT 6906  Stage VI

Total:  60 Units

Note(s)
1 Students must complete six clinical practicums for a total of 1042.5 hours distributed over 29 weeks as set out by the Canadian Council of Physiotherapy University Programs. Students must also complete two non-unit post-clinical placement integration activities. To participate in the clinical placements, students must provide certain documentation required by agencies, by clinical environments and by the Ontario Ministry of Health, which serve to protect clients and students alike.

Master’s with Coursework and Research Paper

Compulsory Courses:
PHT 5512  Anatomie fonctionnelle du système musculo-squelettique  3 Units
PHT 5513  Biomécanique clinique  3 Units
PHT 5614  Évaluations et interventions de base en musculo-squelettique  4.5 Units
PHT 5621  Douleur, agents physiques et modalités thérapeutiques  4.5 Units
PHT 5622  Fondements de la pratique au niveau du système musculo-squelettique  4.5 Units
PHT 5623  Évaluation, diagnostic et intervention au niveau du système musculo-squelettique  4.5 Units
PHT 5631  Fondements et pratiques au niveau du système cardiorespiratoire  6 Units
REA 5703  Pratiques professionnelles en réadaptation  3 Units
PHT 6511  Évaluation et intervention auprès de personnes ayant des affections multiples I  2.5 Units
PHT 6531  Évaluation et intervention auprès de personnes ayant des affections multiples II  2 Units
PHT 6532  Pratique clinique et enjeux professionnels  3 Units
PHT 6533  Outils diagnostiques spécialisés en physiothérapie  3 Units
PHT 6612  Fondements neurobiologiques du mouvement humain  6 Units
PHT 6613  Évaluation, diagnostic et intervention au niveau du système neurologique  4.5 Units

Research Paper:
PHT 6999  Major Paper 1  6 Units

Clinical Placements:

Clinical Placements:

PHT 5901  Stage I
PHT 5902  Stage II
PHT 6903  Stage III
PHT 6904  Stage IV
PHT 6905  Stage V

Note(s)
1 Students must complete six clinical practicums for a total of 1042.5 hours distributed over 29 weeks as set out by the Canadian Council of Physiotherapy University Programs. Students must also complete two non-unit post-clinical placement integration activities. To participate in the clinical placements, students must provide certain documentation required by agencies, by clinical environments and by the Ontario Ministry of Health, which serve to protect clients and students alike.

Note(s)

1. The research paper is an original production which serves to deepen knowledge of an issue related to physiotherapy through research methodology. The topic of the research paper can be theoretical or applied to the field of study (case study). The research paper must be presented orally before professors and students in the program.

2. Students must complete six clinical practicums for a total of 1042.5 hours distributed over 29 weeks as set out by the Canadian Council of Physiotherapy University Programs. Students must also complete two non-unit post-practicum integration activities. To participate in the practicums, students must provide certain documentation required by agencies, by clinical environments and by the Ontario Ministry of Health, which serve to protect clients and students alike.

Specific requirements for the master's program

Minimum Requirements
The passing grade in each individual course is C+. S (Satisfactory) is required for each clinical placement.

Students who fail two courses (course or clinical placement) must withdraw from the program. Students who fail only one course/clinical placement can repeat the course or the clinical placement at the next time the course is offered. Students will not be able to take the courses or clinical placements for which the failed course or clinical placement is a prerequisite. In this case, students will not be able to complete the program within the prescribed time. Failing the repeated course or clinical placement is considered a second failure.

Duration of the Program
The program normally runs over 6 consecutive full-time terms. Students are expected to complete all program requirements, including the Research Project (PHT 6753) or Research paper (PHT 6999), within this two-year period.

Expected Professional Behaviour
As future rehabilitation professionals, physiotherapy students are required to maintain a high level of integrity, as well as personal and professional ethics. The student agrees to adhere to this standard in all aspects of his program (courses, clinical placements, projects) during his interactions with colleagues, professors, clinical supervisors, clients, research participants, academic staff, etc. A list of essential skills and qualifications for physiotherapy students can be found here (http://health.uottawa.ca/rehabilitation/sites/health.uottawa.ca.rehabilitation/files/pt_skills_attributes.pdf).

Requirements for Clinical Placements
Students must adhere to the requirements established by the Office of Risk Management (http://orm.uottawa.ca/clinical-placement/) (RMO) regarding immunizations, police records and any other training or information required to ensure health and safety in clinical placement settings. It is the student's responsibility to know these requirements and to abide by them.

Non-adherence to the requirements can have major consequences, including not being able to start a clinical placement and even withdrawal during a clinical placement.

Presence at the clinical placements is mandatory; the abandonment of a clinical placement already started without good reason is a failure. In accordance with the affiliation agreement between the University of Ottawa and the clinical institution: "The organization may terminate an internship in a clinical setting and prohibit a student from continuing it if, in its opinion, the student's behavior represents a potential danger to its customers or patients or has a negative impact on their well-being or on the personnel of the organization". A student who is dismissed from a clinical placement by the clinical organization will receive a failing grade for this clinical placement.

The clinical placements take place in the Ottawa region as well as in other parts of Ontario and Canada. A student may be assigned to a local clinical placement or outside. In some cases, the Consortium National de Formation en Santé (http://www.cnfs.ca/english/) (CNFS) can help with travel costs for clinical placements.
