HONOURS BSC BIOCHEMISTRY - CHEMICAL BIOLOGY OPTION

Biochemistry is the chemistry of life. It provides the foundation for understanding all biological processes as well as the molecular basis and treatment of human disease.

The biochemistry bachelor’s provides you with the education you need to play a leading role in new and exciting areas of medical research. You will be exposed to cutting-edge research and knowledge. Our program prepares you for graduate studies and for an academic or research career in the medical sciences. What’s more, biochemistry provides an excellent foundation for further studies in medicine and other areas of health care.

You can choose an Honours BSc in Biochemistry, a major or a minor.

If you want to pursue a career in experimental biochemistry, choose the Honours program. If you prefer a basic biochemistry education, choose a major. And if you want to focus on another discipline but are interested in biochemistry, choose a minor.

If you have a particular interest in microorganisms and the role that the immune system plays in health and disease, you can also choose an Honours BSc in biochemistry with an option in microbiology and immunology. We also offer an integrated biotechnology program that lets you combine studies in biochemistry and chemical engineering and receive both a BSc in biochemistry and a BASc in chemical engineering in five years.

As for the language of instruction, compulsory courses and many optional course units are available in either English or French.

If you choose the Honours in Biochemistry, you have the opportunity to complete a full-year research project under the supervision of a professor from the departments of Chemistry and Biomolecular Sciences, Biology, Physics, or Biochemistry, Microbiology and Immunology, or under the supervision of an affiliated principle investigator from one of the many research institutes in the National Capital Region. Given the breadth of research expertise within our program, you can conduct research in many areas of modern biomedicine, including biochemistry, microbiology, immunology, chemical biology, molecular biology, cell biology, proteomics, genomics, systems biology and bioinformatics.

This program is offered in English and in French.

Program Requirements

Co-operative education is available with this program.

The French immersion stream is available with this program.

3 optional course units in English (ENG) at the 1000 or 2000 level

BIO 1130 Introduction to Organismal Biology

BIO 1140 Introduction to Cell and Molecular Biology

CHM 1311 Principles of Chemistry

CHM 1321 Organic Chemistry I

MAT 1330 Calculus for the Life Sciences I

MAT 1332 Calculus for the Life Sciences II

3 course units from:

MAT 1379 Introduction to Biostatistics

BCH 3100 General Intermediary Metabolism

BCH 3165 Protein Structure and Function

BCH 3170 Molecular Biology

BCH 3246 Biochemistry Laboratory II

BCH 3356 Molecular Biology Laboratory

BIO 3153 Cell Biology

CHM 3120 Intermediate Organic Chemistry

CHM 3122 Applications of Spectroscopy in Chemistry

BCH 4116 Analytical Biochemistry

BCH 4932 Biochemistry Seminar

BCH 4040 Honours Research - Biochemistry

3 course units from:

BCH 4101 Human Genome Structure and Function

BCH 4124 Carbohydrates and Glycobiology

BCH 4125 Cellular Regulation and Control

One option from the following:

Option 1: Honours Project

BCH 4040 Honours Research - Biochemistry

Option 2: Honours Project Substitution

3 course units from:

BPS 4104 Bioinformatics Laboratory

BPS 4127 Advanced Techniques in Biosciences

and 6 optional course units at the 3000 or 4000 level in science

9 elective course units from the Faculty of Arts, Faculty of Education, Faculty of Law, Faculty of Social Sciences or the Telfer School of Management

18 elective course units

Total:

120 Units

Note(s)

1 This course runs from September to April.

2 BCH 4040 is highly recommended. A minimum CGPA of 6.5 or greater or a GPA of 6.5 or greater calculated from the two most recent years of full-time study in the Honours Biochemistry program (minimum of 54 units including all compulsory all compulsory 3000 level courses) is required. This course runs from September to April.

Please note that all programs in the Faculty of Science require a minimum of 12 elective course units from the Faculty of Arts, the Faculty of Education, the Faculty of Law, the Faculty of Social Sciences or the Telfer School of Management. Once you have decided on the replacement courses, please inform the Office of Undergraduate Programs of the
