HONOURS BSC IN CHEMISTRY

Chemistry is a modern, dynamic and diverse field that involves investigating the substances that make up our physical world and how they change. Chemistry touches everything we come into contact with. It is connected to almost all areas of science and engineering. For example, chemists play a vital role in developing new drugs, understanding and modifying biological processes and making materials for advanced electronic devices. Chemists are also important players in such diverse areas as genetic engineering, forensic science and the oil and gas industry. More recently, chemists have been at the forefront of nanotechnology and emerging green technologies, particularly in the development of sustainable energy sources.

The Department of Chemistry and Biomolecular Sciences at the Faculty of Science offers chemistry, biochemistry and biopharmaceutical science programs with unique options in medicinal chemistry, genomics, advanced materials chemistry, ecochemistry and chemical biology. In addition to classroom teaching, programs offer practical laboratory training with a focus on individual instruction.

This program is offered in English and in French.

Program Requirements

Co-operative education is available with this program.

The extended French stream is available with this program.

Requirements for this program have been modified. Please consult the 2015-2016 calendars (http://www.uottawa.ca/academic/info/regist/1516/calendars) for the previous requirements.

### Option 1: Honours Project

CHM 4010 Research Project

### Option 2: Honours Project Co-op Option

CHM 4016 Research Project

and 3 optional course units in chemistry (CHM) at the 3000 or 4000 level

3 optional course units in chemistry (CHM) at the 2000, 3000 or 4000 level

3 course units from Physical-Theoretical:

CHM 4141 Computational Chemistry I
CHM 4143 Computational Chemistry II
CHM 4182 Molecular Dynamics in Chemistry
CHM 4340 Application of Theoretical Chemistry
CHM 4380 Advanced Characterization Methods in Material Science and Catalysis
CHM 4381 Photochemistry and Photobiology
CHM 4390 Special Topics in Physical Chemistry
CHM 4391 Selected Topics in Physical Chemistry

3 course units from Organic - Bio-organic:

BIM 4316 Modern Bioanalytical Chemistry

### Total:

18 elective course units

18 Units

---

This message is intended for students registered in the Faculty of Science. If the components of your program of study require common compulsory courses, you will have to replace the units as follows:

1. 1000-level courses must be replaced with elective course units;
2. 2000-level courses and above must be replaced with optional course units from either discipline at the same level or above.

Please note that all programs in the Faculty of Science require a minimum of 12 elective course units from the Faculty of Arts, the Faculty of Education, the Faculty of Law, the Faculty of Social Sciences or the Telfer School of Management. Once you have decided on the replacement courses, please inform the Office of Undergraduate.
This is a copy of the 2018-2019 catalog.

Programs of the Faculty of Science by email at infosci@uOttawa.ca so that we may amend your Academic Advisement accordingly.
