HONOURS BSC COMPUTER SCIENCE

Computer science at the School of Electrical Engineering and Computer Science combines the study of computation and information processing fundamentals with their application in the world around us. Computer scientists build fast, reliable, scalable and secure software systems to organize and analyze information. The honours curriculum comprises advanced topics in databases, artificial intelligence, computer graphics, security, distributed computing and algorithm design, culminating in an honours project.

This program teaches graduates how to use their creative and innovative talents to conceive, design and implement software systems. The French Immersion Stream is now available to all students in the Computer Science program. Our degrees are very flexible and include options, minors and a major, which can be used to explore connections between computer science and many other fields of study.

This program is offered in English and in French.

Program Requirements

Co-operative education is available with this program.

The French immersion stream is available with this program.

Requirements for this program have been modified. Please consult the 2019-2020 calendars (http://catalogue.uottawa.ca/en/archives/) for the previous requirements.

ENG 1112  Technical Report Writing  3 Units
ITI 1100  Digital Systems I  3 Units
ITI 1120  Introduction to Computing I  3 Units
ITI 1121  Introduction to Computing II  3 Units
MAT 1320  Calculus I  3 Units
MAT 1322  Calculus II  3 Units
MAT 1341  Introduction to Linear Algebra  3 Units
MAT 1348  Discrete Mathematics for Computing  3 Units
CEG 2136  Computer Architecture I  3 Units
CSI 2101  Discrete Structures  3 Units
CSI 2110  Data Structures and Algorithms  3 Units
CSI 2120  Programming Paradigms  3 Units
CSI 2132  Databases I  3 Units
CSI 2911  Professional Practice in Computing  3 Units
MAT 2377  Probability and Statistics for Engineers  3 Units
SEG 2105  Introduction to Software Engineering  3 Units
CSI 3104  Introduction to Formal Languages  3 Units
CSI 3105  Design and Analysis of Algorithms I  3 Units
CSI 3120  Programming Language Concepts  3 Units
CSI 3131  Operating Systems  3 Units
CSI 3140  WWW Structures, Techniques and Standards  3 Units
CEG 3185  Introduction to Data Communications and Networking  3 Units
CSI 4900  Honours Project  3 Units

One option from the following:  6 Units

Option 1:
6 optional course units in computer engineering (CEG), in electrical engineering (ELG) or in software engineering (SEG) at the 3000 level; or in computer science (CSI) at the 4000 level

Option 2:

CSI 2372  Advanced Programming Concepts With C++
and 3 optional course units in computer engineering (CEG), in electrical engineering (ELG) or in software engineering (SEG) at the 3000 level; or in computer science (CSI) at the 4000 level

12 optional course units in computer science (CSI) at the 4000 level
3 optional course units in computer science (CSI) or software engineering (SEG) at the 3000 or 4000 level
27 course units of non-computing, non mathematics courses 27 Units
3 course units of free elective courses 3 Units

Total:  120 Units

Note(s)

As electives, students are encouraged to choose fifteen units of business or science courses (other than MAT) and twelve units of humanities or social sciences courses. Alternatively, students may take a minor in a domain in which they expect to apply computing skills: The minor in Information Management Systems is specifically designed for this. See School of Management.
