HONOURS BSC IN PHYSICS

Why is our world the way it is? How can we understand and explain what we observe around us, from the smallest sub-atomic particles to the largest galaxies? How can we apply this understanding to manipulate our world? Studying physics gives insight into the fundamental laws of nature.

But an education in physics gives so much more. The rigorous training our students receive in analyzing and understanding complex problems is valuable in many future careers. While many of our graduates have established careers in universities and in the high tech sector as research and development scientists, others have used their physics degrees as a springboard to careers in finance, administration, medicine, management or education. The range of career opportunities is perhaps wider than for any other students with a science education.

Physicists have revolutionized the way we live our lives, with groundbreaking discoveries and new technologies, transferable to other fields such as biology or finance. Our professors and graduates are an important part of this chain. Many of our professors have also been recognized for their teaching and are seen as world-class researchers in their fields of expertise.

The research conducted by the professors in the Department of Physics is concentrated in several sub-specialties, including the physics of biological and complex systems, condensed matter physics, photonics and the physics of geomaterials. Depending upon your choice of program, you have the opportunity to take courses and participate in research projects in these specialized areas.

In addition to the Honours BSc in Physics, we offer three other Honours BSc programs. The first is in physics-mathematics, which provides enriched mathematics training within a physics program. The second is the option in photonics, which gives students a solid training in physics and a more applied and industry-related training in photonics. The third is the option in biological physics, which teaches students to apply a rigorous education in physics to various areas of life sciences. We also offer a Major in Physics that can form the core of an Honours BSc when combined with a major or a minor in another discipline in the Faculty of Science, or in another faculty. Finally, starting in fall 2016, we will offer a five-year integrated program in physics (BSc) and electrical engineering (BASc), jointly with the School of Electrical Engineering and Computer Science (SEECS). This unique program will offer a full education in physics and electrical engineering. Graduates will be sought after by industry and academia, as they will have the capacity to develop technology from a basic physics idea to the final product.

The Department of Physics also has strong graduate programs, leading to an MSc or PhD. They give students the opportunity to work on cutting edge science in a research group led by one or more department professors.

This program is offered in English and in French.

Program Requirements

Co-operative education is available with this program.

The French immersion stream is available with this program.

3 course units from:

GNG 1106  Fundamentals of Engineering Computation

Program Requirements

Co-operative education is available with this program.

The French immersion stream is available with this program.

3 course units from:

MAT 1320  Calculus I

3 course units from:

MAT 1322  Calculus II

MAT 1325  Calculus II and an Introduction to Analysis

MAT 1341  Introduction to Linear Algebra

PHY 1121  Fundamentals of Physics I

PHY 1122  Fundamentals of Physics II

3 course units from:

MAT 2122  Multivariable Calculus

MAT 2322  Calculus III for Engineers

3 course units from:

MAT 2324  Ordinary Differential Equations and the Laplace Transform

MAT 2384  Ordinary Differential Equations and Numerical Methods

PHY 2104  Introduction to Circuit Theory and Electronics

PHY 2311  Waves and Optics

PHY 2323  Electricity and Magnetism

PHY 2333  Mechanics

PHY 2361  Modern Physics

PHY 3320  Electromagnetic Theory

PHY 3341  Theoretical Physics

PHY 3350  Thermodynamics

PHY 3355  Statistical Thermodynamics

PHY 3370  Introductory Quantum Mechanics

PHY 3902  Physics and Applied Physics Laboratory I

PHY 3904  Physics and Applied Physics Laboratory II

PHY 4370  Quantum Mechanics

PHY 4382  Introduction to Solid State Physics

One option from the following:

Option 1:

PHY 4006  Physics Research Project

Option 2:

PHY 4903  Physics Laboratory

PHY 4906  Physics Project

3 optional course units in mathematics (MAT) at the 2000, 3000 or 4000 level, excluding MAT 2379

9 optional course units in physics (PHY) at the 4000 or 5000 level

12 elective course units from the Faculty of Arts, the Faculty of Education, the Faculty of Law, the Faculty of Social Sciences or the Telfer School of Management.

24 elective course units

Total:

120 Units

Note(s)

1. ITI 1120 is a prerequisite for most computer science courses (CSI).
2. GNG 1106 is recommended for students not taking further computer science courses (CSI).
3. MAT 1322 is recommended.
4. (MAT 2141 or MAT 2342) or (MAT 2371 or MAT 2377) is recommended.

Of the 24 elective course units, some breadth in other sciences is recommended, particularly CHM 1311.

Please note that all programs in the Faculty of Science require a minimum of 12 elective course units from the Faculty of Arts, the Faculty of Education, the Faculty of Law, the Faculty of Social Sciences or the Telfer School of Management. Once you have decided on the replacement courses, please inform the Office of Undergraduate Programs of the Faculty of Science by email at infosci@uOttawa.ca so that we may amend your Academic Advisement accordingly.
