

HONOURS BSOCSC ECONOMICS

Ever wonder why some countries are richer than others? Ever question why income inequality has been growing? Ever wonder why Canadian politicians worry when other countries may be going bankrupt? Economics can answer all these questions.

Economics examines how individuals and society make choices in a world where resources are limited. It focuses on the production, distribution and consumption of goods and services. Two important themes are efficiency (the absence of waste in the use of resources) and fairness. Since making choices is central to all human activities, studying economics often helps explain why people and governments behave in certain ways.

This program is offered in English and in French.

Note(s)

- Students who intend to pursue graduate studies in economics should select MAT 1300 or the sequence MAT 1320 and MAT 1325 (this last course can be replaced by MAT 1322). A strong background in mathematics helps students succeed in advanced courses and graduate studies in economics.
- Students who intend to participate in the CO-OP program should take ECO 2150 and ECO 2151 in their second year.
