

# JOINT HONOURS BSOCSC IN ECONOMICS AND POLITICAL SCIENCE

## Economics

Ever wonder why some countries are richer than others? Ever question why income inequality has been growing? Ever wonder why Canadian politicians worry when other countries may be going bankrupt? Economics can answer all these questions.

Economics examines how individuals and society make choices in a world where resources are limited. It focuses on the production, distribution and consumption of goods and services. Two important themes are efficiency (the absence of waste in the use of resources) and fairness. Since making choices is central to all human activities, studying economics often helps explain why people and governments behave in certain ways.

## Political Science

Politics is omnipresent in our lives. Political science seeks to describe, analyze, understand and assess the principles and power relations that govern social life. It revolves as much around the structures and institutions that define these relations and principles as around the ideas and practices that drive them. It studies everything that influences political life and institutions (ideologies, groups, social movements, etc.) on a local, regional, national and international scale.

Our programs offer in-depth training in political science and encourage critical reflection on pivotal issues like citizenship, identity, political participation, globalization and development, governance and the state, and ethics and democracy. A discipline open to many theoretical and methodological approaches, political science constantly exchanges and shares with other fields. At the University of Ottawa's School of Political Studies, you build your knowledge in four subfields of political science: political thought, Canadian and Quebec politics, comparative politics, and international relations and global politics.

This program is offered in English and in French.

Note(s)

- <sup>1</sup> Students who intend to pursue graduate studies in economics should select MAT 1300 or the sequence MAT 1320 and MAT 1325 (this last course can be replaced by MAT 1322). A strong background in mathematics helps students succeed in advanced courses and graduate studies in economics.
- <sup>2</sup> Students who intend to participate in the CO-OP program should take ECO 3150 and ECO 3151 in their second year.
