MAJOR IN BIOCHEMISTRY

Biochemistry is the chemistry of life. It provides the foundation for understanding all biological processes as well as the molecular basis and treatment of human disease.

The biochemistry bachelor's provides you with the education you need to play a leading role in new and exciting areas of medical research. You will be exposed to cutting-edge research and knowledge. Our program prepares you for graduate studies and for an academic or research career in the medical sciences. What's more, biochemistry provides an excellent foundation for further studies in medicine and other areas of health care.

You can choose an Honours BSc in Biochemistry, a major or a minor.

If you want to pursue a career in experimental biochemistry, choose the Honours program. If you prefer a basic biochemistry education, choose a major. And if you want to focus on another discipline but are interested in biochemistry, choose a minor.

If you have a particular interest in microorganisms and the role that the immune system plays in health and disease, you can also choose an Honours BSc in biochemistry with an option in microbiology and immunology. We also offer an integrated biotechnology program that lets you combine studies in biochemistry and chemical engineering and receive both a BSc in biochemistry and a BASc in chemical engineering in five years.

As for the language of instruction, compulsory courses and many optional course units are available in either English or French.

If you choose the Honours in Biochemistry, you have the opportunity to complete a full-year research project under the supervision of a professor from the departments of Chemistry and Biomolecular Sciences, Biology, Physics, or Biochemistry. Microbiology and Immunology, or under the supervision of an affiliated principle investigator from one of the many research institutes in the National Capital Region. Given the breadth of research expertise within our program, you can conduct research in many areas of modern biomedicine, including biochemistry, microbiology, immunology, chemical biology, molecular biology, cell biology, proteomics, genomics, systems biology and bioinformatics.

This program is offered in English and in French.

Program Requirements

The table below includes only the discipline-specific courses. Please refer to the Academic Regulations (http://web5.uottawa.ca/admingov/regulations.html) for information on the Honours bachelor's with double major and the Honours bachelor's with major and minor.

Co-operative education is available when taken as part of an honours degree.

The extended French stream is available when taken as part of an honours degree.

Requirements for this program have been modified. Please consult the 2018-2019 calendars (https://catalogue.uottawa.ca/en/archives) for the previous requirements.

CHM 1321 Organic Chemistry I 3 Units
MAT 1330 Calculus for the Life Sciences I 3 Units
MAT 1332 Calculus for the Life Sciences II 3 Units
PHY 1321 Principles of Physics I 3 Units
3 courses units from:
  PHY 1322 Principles of Physics II 3 Units
BCH 2333 Introduction to Biochemistry 3 Units
BCH 2334 Introduction to Cell Biology 3 Units
BCH 2335 Introduction to Molecular Biology 3 Units
BCH 2346 Biochemistry Laboratory I 3 Units
BCH 3346 Biochemistry Laboratory II 3 Units
6 course units from:
  BCH 4101 Human Genome Structure and Function 3 Units
  BCH 4116 Analytical Biochemistry 3 Units
  BCH 4122 Structural Biology of Proteins 3 Units
  BCH 4123 Pathological Biochemistry 3 Units
  BCH 4124 Carbohydrates and Glycobiochemistry 3 Units
  BCH 4125 Cellular Regulation and Control 3 Units
  BCH 4172 Topics in Biotechnology 3 Units
  BCH 4188 Nucleic Acids Structure and Functions 3 Units
  BPS 3101 Genomics 3 Units
  BPS 4129 Advanced Chemical Biology 3 Units
CHM 4139 Enzyme Chemistry and Biocatalysis 3 Units

Total: 60 Units

Note(s)

1 A maximum of 3 course units may be selected amongst these courses.
2 These courses may not be available every year.

Please note that all programs in the Faculty of Science require a minimum of 12 course elective units offered by the Faculty of Arts, the Faculty of Education, the Faculty of Law, the Faculty of Social Sciences or the Telfer School of Management. Once you have decided on the replacement courses, please inform the Office of Undergraduate Programs of the Faculty of Science by email at infosci@uOttawa.ca so that we may amend your Academic Advisement accordingly.
