

# MAJOR IN PHYSICAL GEOGRAPHY AND GEOMATICS

Physical Geography is the scientific study of processes and patterns at the Earth's surface. It uses field and laboratory measurements and spatial data to evaluate our world's changing climates, water, land, plants and animals. Physical geographers are trained to synthesize environmental knowledge and apply it to real-world problems such as coastal erosion or loss of habitat. Solving these problems also requires the collection, management and computer analysis of the vast amounts of spatial data now available, which is the domain of Geomatics.

Students in the Major in Physical Geography and Geomatics at the University of Ottawa learn to use the full range of geospatial technologies (drones/UAVs, global positioning systems, geographic information systems, satellite imaging, spatial analysis) to study environments ranging from the mountains of the Yukon to the coral reefs of Zanzibar. Graduates from the program will have the scientific knowledge and the technical skills to become leaders in these growing fields.

The program is offered in English and in French.

## Program Requirements

The table below includes only the discipline-specific courses. Please refer to the Academic Regulations (<https://www.uottawa.ca/administration-and-governance/academic-regulation-3-program-of-studies/>) for information on the Honours bachelor's with double major and the Honours bachelor's with major and minor.

Co-operative education is available when taken as part of an honours degree.

The French immersion stream is available when taken as part of an honours degree.

This program cannot be combined with the Minor in Geomatics.

This program partially satisfies the academic requirements of the Association of Professional Geoscientists of Ontario.

### Compulsory courses at the 1000 level

GEG 1301	The Physical Environment	3 Units
----------	--------------------------	---------

ITI 1120	Introduction to Computing I	3 Units
----------	-----------------------------	---------

### Compulsory courses at the 2000 level

GEG 2301	Geomorphology	3 Units
----------	---------------	---------

GEG 2304	Climatology	3 Units
----------	-------------	---------

GEG 2320	Introduction to Geomatics	3 Units
----------	---------------------------	---------

GEG 2918	Field Camp I	3 Units
----------	--------------	---------

### Compulsory courses at the 3000 level

GEG 3105	Remote Sensing	3 Units
----------	----------------	---------

GEG 3312	Advanced GIS	3 Units
----------	--------------	---------

### Compulsory courses at the 4000 level

GEG 4301	Advanced Geomatics	3 Units
----------	--------------------	---------

### Optional courses

9 optional course units from:	9 Units
-------------------------------	---------

BIO 1130	Introduction to Organismal Biology
----------	------------------------------------

CHM 1311	Principles of Chemistry
----------	-------------------------

GEO 1111	Introduction to Earth Systems
----------	-------------------------------

GEO 1115	Introduction to Earth Materials
----------	---------------------------------

PHY 1321	Principles of Physics I
----------	-------------------------

6 optional course units from one of the following options:	6 Units
--	---------

#### Option 1

MAT 1320	Calculus I
----------	------------

MAT 1322	Calculus II
----------	-------------

#### Option 2

MAT 1330	Calculus for the Life Sciences I
----------	----------------------------------

MAT 1332	Calculus for the Life Sciences II
----------	-----------------------------------

3 optional course units from: <sup>1</sup>	3 Units
--	---------

GEG 4000	Field Research
----------	----------------

GEG 4001	Northern Field Research
----------	-------------------------

GEG 4100	Glaciology
----------	------------

GEG 4921	Physical Geography Field Camp
----------	-------------------------------

15 optional course units from:	15 Units
--------------------------------	----------

GEG 3101	Advanced Geomorphology
----------	------------------------

GEG 3102	Hydrology
----------	-----------

GEG 3114	Biogeography
----------	--------------

GEG 3300	Selected Topics in Physical Geography
----------	---------------------------------------

GEG 3306	Quaternary Paleogeography
----------	---------------------------

GEG 3524	Histoire de la géographie
----------	---------------------------

GEG 4000	Field Research
----------	----------------

GEG 4001	Northern Field Research
----------	-------------------------

GEG 4101	Permafrost Environments
----------	-------------------------

GEG 4120	GIS and Numerical Spatial Analysis
----------	------------------------------------

GEG 4121	Applications of Remote Sensing in the Polar Regions
----------	---

GEG 4126	Seminar in Physical Geography
----------	-------------------------------

GEG 4129	Global Climate Change
----------	-----------------------

GEG 4512	Paléoenvironnements du quaternaire
----------	------------------------------------

Total:	60 Units
--------	----------

<sup>1</sup> GEG 4000 and GEG 4001 are 6 unit courses. The extra 3 units will count towards optional 3000 or 4000 level course units.
