

MAÎTRISE ÈS SCIENCES APPLIQUÉES GÉNIE CIVIL SPÉCIALISATION EN SCIENCE, SOCIÉTÉ ET POLITIQUE PUBLIQUE

En bref

- Grade universitaire offert : Maîtrise ès sciences appliquées (M.Sc.A.)
- Options de statut d'inscription : Temps complet ou temps partiel
- Langue d'enseignement : Anglais
- Programme principal : M.Sc.A. Génie civil
- Spécialisation pluridisciplinaire : Science, société et politique publique
- Option d'étude (durée prévue du programme) :
 - dans une période de 2 ans à temps complet
- Unités scolaires : Faculté de génie (<http://genie.uottawa.ca>), département de génie civil (<http://genie.uottawa.ca/civil>), Institut de génie civil d'Ottawa-Carleton (<http://www.ocice.ca>) (disponible en anglais seulement), Institut de recherche sur la science, la société et la politique publique. (<http://issp.uottawa.ca/fr>)

Description du programme

Programme conjoint Ottawa-Carleton

Fondé en 1984, l'Institut de génie civil d'Ottawa-Carleton (IGCOC) combine les ressources en recherche du Département de génie civil de l'Université d'Ottawa et du Département de génie civil et environnemental de la Carleton University.

L'Institut est l'une des unités participant au programme pluridisciplinaire en science, société et politique publique.

Les installations de recherche sont partagées entre les deux campus. Les étudiants ont accès aux cours, à l'équipement et aux professeurs des deux universités, mais doivent s'inscrire à l'université d'attache de leur directeur de recherche.

Description du programme pluridisciplinaire

Le programme pluridisciplinaire en Science, société et politique publique permet aux étudiantes et étudiants inscrits à l'un des programmes de maîtrise participants de se spécialiser dans le domaine des politiques en matière de science et d'innovation.

L'objectif du programme pluridisciplinaire est de fournir aux étudiantes et étudiants les connaissances et les compétences requises pour évaluer les défis à la croisée de la science et des politiques publiques. Les étudiantes et étudiants auront l'occasion d'explorer le rôle des données probantes dans le processus de prise de décision, l'influence des politiques sur l'évolution de l'entreprise scientifique, et les implications sociales des technologies émergentes.

Le grade octroyé indique le programme principal avec la mention « spécialisation en science, société et politique publique ».

Principaux domaines de recherche

- Génie environnemental
- Génie géotechnique
- Génie des structures
- Génie des ressources hydroliques
- Ingénierie et gestion de la construction
- Matériaux et constructions durables

Autres programmes offerts dans la même discipline ou dans une discipline connexe

- Maîtrise ès sciences appliquées Génie civil (M.Sc.A.)
- Maîtrise ès sciences appliquées Génie de l'environnement (M.Sc.A.)
- Maîtrise ès sciences appliquées Génie de l'environnement Spécialisation en durabilité de l'environnement (M.Sc.A.)
- Maîtrise en ingénierie Génie civil (M.Ing.)
- Maîtrise en ingénierie Génie de l'environnement (M.Ing.)
- Doctorat en philosophie Génie civil (Ph.D.)
- Doctorat en philosophie Génie de l'environnement (Ph.D.)

Coût et financement

- Frais reliés aux études :

Le montant estimé des droits universitaires (<https://www.uottawa.ca/droits-universitaires>) de ce programme est disponible sous la section Financer vos études (<http://www.uottawa.ca/etudes-superieures/programmes-admission/financer-etudes>).

Les étudiants internationaux inscrits à un programme d'études en français peuvent bénéficier d'une exonération partielle des droits de scolarité (<https://www.uottawa.ca/droits-universitaires/exoneration-partielle-des-droits-de-scolarite>).

- Pour des renseignements sur les moyens de financer vos études supérieures, veuillez consulter la section Bourses et appui financier (<https://www.uottawa.ca/etudes-superieures/etudiants/bourses>).

Notes

- Les admissions sont régies par les règlements généraux (<http://www.uottawa.ca/etudes-superieures/etudiants/reglements-generaux>) en vigueur pour les études supérieures et les règlements généraux de l'Institut de génie civil d'Ottawa-Carleton (IGCOC).
- Conformément au règlement de l'Université d'Ottawa, les étudiants ont le droit de rédiger leurs travaux, leur thèse et de répondre aux questions d'examen en français ou en anglais.
- Les activités de recherche peuvent se dérouler soit en anglais, soit en français, soit dans les deux langues selon les compétences linguistiques des professeurs et des membres du groupe de recherche concernés.

Exigences d'admission

Pour connaître les renseignements à jour concernant les dates limites, les tests de langues et autres exigences d'admission, consultez la page des exigences particulières (<https://www.uottawa.ca/etudes-superieures/programmes-admission/admission/exigences-particulieres>).

Pour être admissible, vous devez :

- Être titulaire d'un baccalauréat spécialisé (ou avec majeure) en génie civil ou autres disciplines connexes, considérées comme étant du domaine du génie civil, avec une moyenne minimale de B (70 %);

Note : Les candidats internationaux doivent vérifier les équivalences d'admission (<https://www.uottawa.ca/etudes-superieures/international/etudier-uottawa/equivalences-admission>) pour le diplôme obtenu dans leur pays de provenance.

- Les demandes d'admission à un programme de propédeutique émanant de candidats diplômés d'autres programmes de génie ou de programmes de baccalauréat avec spécialisation en sciences, seront sujettes aux conditions suivantes :
- Les candidats qui détiennent un diplôme en génie ou qui ont terminé un programme avec spécialisation en sciences incluant un contenu en mathématiques équivalant au programme de génie civil devront suivre au moins quatre cours de premier cycle en génie civil dans leur domaine de spécialité au deuxième cycle en vue de se qualifier.
- Les candidats provenant d'autres programmes de sciences devront suivre tous les cours obligatoires de mathématiques du programme de premier cycle en génie civil en plus de satisfaire aux conditions énoncées ci-dessus. Les cours de premier cycle exigés figureront au certificat d'admission.
- Démontrer une bonne aptitude à la recherche que ce soit dans le contexte d'un projet de quatrième année au baccalauréat ou par

la rédaction de rapports de recherche, de résumés ou d'autres documents démontrant des habiletés de recherche.

- Identifier au moins un professeur prêt à diriger votre recherche et votre thèse.
 - Il est recommandé de communiquer avec le directeur de thèse dès que possible.
 - Pour pouvoir vous inscrire, vous devez faire accepter votre candidature par un directeur de thèse.
 - Le nom du professeur est requis lors de la demande d'admission.
 - Le choix du professeur détermine le campus où il faut poursuivre la recherche et ce sera aussi l'université qui octroie le diplôme.

Exigences linguistiques

Les candidats doivent comprendre et parler couramment la langue d'enseignement du programme dans lequel ils veulent s'inscrire. Une preuve de compétence linguistique peut être requise.

Ceux dont la langue maternelle n'est ni le français ni l'anglais doivent fournir une preuve de compétence dans la langue d'enseignement.

Note : Les coûts des tests de compétences linguistiques devront être assumés par le candidat.

Notes

- Les installations de recherche sont partagées entre les deux campus. Les étudiants ont accès aux cours, à l'équipement et aux professeurs des deux universités mais doivent s'inscrire à l'université d'attache de leur directeur de recherche.
- Les conditions d'admission décrites ci-dessus représentent des exigences minimales et ne garantissent pas l'admission au programme.
- Les cours de premier cycle en génie civil ne seront pas crédités au programme d'études supérieures. Des cours de premier cycle peuvent malgré tout être exigés en vue de satisfaire aux conditions d'admission.
- L'admission aux programmes d'études supérieures en génie civil est régie par les règlements généraux (<http://www.uottawa.ca/etudes-superieures/etudiants/reglements-generaux>) en vigueur pour les études supérieures et les règlements généraux de l'Institut de génie civil d'Ottawa-Carleton (IGCOC).
- Il faut indiquer dans la demande initiale d'admission au programme de maîtrise en génie civil qu'on veut être accepté dans le programme pluridisciplinaire en Science, société et politique publique.

Documents exigés pour l'admission

En plus des documents exigés (<http://www.uottawa.ca/etudes-superieures/programmes-admission/admission/documents-exiges>) par les études supérieures et postdoctorales, les candidats doivent soumettre les documents suivants :

- Un curriculum vitae
- Une lettre d'intention, de motivation

Lettre démontrant vos aspirations professionnelles et votre domaine de recherche.

- Deux lettres de recommandation confidentielles de professeurs familiers avec l'étudiant et son travail.

Il est fortement recommandé de contacter votre répondant avant de soumettre votre demande d'admission pour confirmer leur adresse électronique et leur disponibilité à compléter un formulaire de recommandation en votre nom.

- Relevé(s) de notes officiels de toutes les études postsecondaires antérieures :
 - La remise de tous les relevés de notes officiels des universités fréquentées est obligatoire. Cette obligation s'applique à tous les genres de cours et/ou de programmes suivis tels : les programmes réguliers (terminés ou non), les échanges, les lettres de permission, les cours suivis à titre d'étudiant libre (incluant les cours offerts soit à distance ou en ligne) etc.
 - Si le relevé de notes et le diplôme sont rédigés dans une langue autre que l'anglais ou le français, une traduction certifiée (signée et scellée) doit également être soumise.
- Un formulaire de préférence (http://engineering.uottawa.ca/downloads/pdf/OCICE_Preference.pdf) (disponible en anglais seulement)
- Un formulaire de demande d'admission au programme pluridisciplinaire (<http://issp.uottawa.ca/fr/education/pluridisciplinaireSSP>)

Dans le cas d'un programme avec thèse, le formulaire de demande d'admission au programme pluridisciplinaire doit être signé par le directeur de thèse, confirmant son consentement à participer au programme pluridisciplinaire.

- Une lettre de motivation (<http://issp.uottawa.ca/fr/education/pluridisciplinaireSSP>) d'une page (500 mots maximum) décrivant son intérêt dans le programme pluridisciplinaire et la façon dont son sujet ou domaine de recherche va de pair avec le champ d'étude de l'Institut de recherche sur la science, la société et la politique publique.

Note : Les documents non requis à l'admission ne seront ni consultés, ni conservés, ni retournés à l'étudiant. Ces documents seront détruits selon nos procédures administratives.

Exigences du programme Maîtrise avec spécialisation pluridisciplinaire

Les exigences de ce programme ont été modifiées. Les exigences antérieures peuvent être consultées dans les annuaires 2018-2019 (<http://catalogue.uottawa.ca/fr/archives>).

Les exigences à remplir pour la maîtrise avec spécialisation pluridisciplinaire sont les suivantes :

Cours obligatoires (CVG) :

15 crédits de cours optionnels en génie civil (CVG) de niveau gradué	15 crédits
--	------------

Cours obligatoires (ISP) :

ISP 5101	Decision at the Interface of Science and Policy	3 crédits
----------	---	-----------

Séminaire :

CVG 5366	Master's Seminar in Civil Engineering
----------	---------------------------------------

Thèse :

THM 7999	Thèse de maîtrise ^{1,2}
----------	----------------------------------

Note(s)

- ¹ Présentation et soutenance d'une thèse en science, société ou politique publique fondée sur des travaux de recherche effectués sous la direction d'un professeur membre du programme en génie civil ou du programme pluridisciplinaire. Le Comité des études supérieures en science, société et politique publique déterminera si le sujet de la thèse convient à la désignation de « spécialisation en science, société et politique publique ». Au moins un des membres du comité consultatif de thèse et des examinateurs de la thèse doit avoir été recommandé par le Comité des études supérieures en science, société et politique publique.
- ² L'étudiant est responsable de s'assurer de rencontrer les exigences relatives à la thèse. (<http://www.uottawa.ca/etudes-superieures/etudiants/theses>)

Exigences minimales

La note de passage dans tous les cours est de B.

Les étudiants qui échouent 6 crédits doivent se retirer du programme.

Passage accéléré de la maîtrise au doctorat

Les étudiants inscrits au programme de maîtrise en génie civil à l'Université d'Ottawa ont la possibilité de passer directement au programme de doctorat sans avoir à rédiger la thèse de maîtrise. Pour de plus amples renseignements, veuillez consulter la section « Exigences d'admission » du programme de doctorat.

Recherche Domaines de recherche et installations

Située au cœur de la capitale du Canada, à quelques pas de la colline du Parlement, l'Université d'Ottawa est l'une des 10 principales universités de recherche au Canada.

uOttawa concentre ses forces et ses efforts dans quatre axes prioritaires de développement de la recherche :

- Le Canada et le monde
- La santé
- La cybersociété
- Les sciences moléculaires et environnementales

Grâce à leurs recherches de pointe, nos étudiants diplômés, nos chercheurs et nos professeurs exercent une forte influence sur les priorités à l'échelle nationale et internationale.

La recherche à la Faculté de génie

Principaux domaines de recherche :

- Génie chimique et biologique
- Génie civil
- Science informatique et génie électrique
- Génie mécanique

Vous consultez la version 2019-2020 du catalogue.

Pour d'autres informations, veuillez consulter la liste des membres du corps professoral et leurs domaines de recherche sur **Uniweb**.

IMPORTANT : Les candidats et les étudiants à la recherche de professeurs pour superviser leur thèse ou leur projet de recherche peuvent aussi consulter le site Web de la faculté ou du département (<https://www.uottawa.ca/etudes-superieures/etudiants/coordonnees-unites-scolaires>) du programme de leur choix. La plateforme Uniweb n'est pas représentative de l'ensemble du corps professoral autorisé à diriger des projets de recherche à l'Université d'Ottawa.

Cours

Les cours suivants ne sont pas tous offerts chaque année.

CVG 5100 Deep Foundations (3 units)

Deep foundation types in North American practice (driven or bored piles, and slurry trench techniques); axial and lateral capacity and settlement analysis for single piles and pile groups; field inspection methods; pile dynamics; performance and analysis of static test loading. This course is equivalent to CIVJ 5000 at Carleton University.

Course Component: Lecture

CVG 5106 Site Improvements (3 units)

Description, design procedures and usage of current site improvement techniques, including preloading, earth reinforcement, dynamic consolidation, vibrocompaction, blasting densification, lime treatment, drains, and geotechnical fabrics. This course is equivalent to CIVJ 5006 at Carleton University.

Course Component: Lecture

CVG 5111 Hydraulic Structures (3 units)

Classification and function of hydraulic structures; analysis and design of hydraulic works for gravity dams, arch dams, earth fill and rock-fill dams; ancillary works including water intakes, various types of spillways, control structures, energy dissipation and stilling basin, bottom outlets. Advanced topic in channel design including transitions; hydraulic transients, free surface and free surge analysis; water towers and compensation basins; penstocks. Navigation locks. Coastal protection works and maritime structures. This course is equivalent to CIVJ 5501 at Carleton University.

Course Component: Lecture

CVG 5112 Computational Hydrodynamics (3 units)

Finite volume methods for advection, diffusion and shallow water equations using structured and unstructured grids, finite volume methods for incompressible Navier-Stokes equations (SIMPLE, SIMPLER, PISO), error analysis: numerical diffusion and dispersion, truncation errors and Fourier analysis, introduction to turbulence modeling, introduction to methods for tracking free surfaces and moving beds, introduction to other methods in hydrodynamics: finite element, finite difference, Chebyshev and Fourier spectra, semi Lagrangian and vortex methods in hydrodynamics. This course is equivalent to CIVJ 5502 at Carleton University.

Course Component: Lecture

CVG 5120 Water Resources Systems (3 units)

Conservation of water resources. Multi-purpose project planning: study of domestic and foreign water development projects. Techniques for simulation, optimization, linear and dynamic programming. This course is equivalent to CIVJ 5506 at Carleton University.

Course Component: Lecture

CVG 5123 Advanced Topics in Hydrology (3 units)

Selected topics of current interest in surface and groundwater hydrology. This course is equivalent to CIVJ 5509 at Carleton University.

Course Component: Lecture

CVG 5124 Coastal Engineering (3 units)

Key concepts in coastal engineering: (1) wave mechanics and coastal hydrodynamics, (2) sediment transport and coastal morphodynamics and (3) coastal structures and coastal zone management. Wave mechanics and coastal hydrodynamics to include small-amplitude wave theory, finite amplitude wave theories (Stokes, Cnoidal and solitary wave), wave generation, wave transformations, development and prediction, hydrodynamics of coastal circulation. Sediment transport and coastal morphodynamics to include: wave and current-induced sediment transport, coastal sediment processes, longshore and cross-shore beach morphologic transformations, etc. Coastal structures and coastal zone management to include: beach erosion control, coastal structures (dikes, breakwaters, groins, seawalls), beach nourishment, coastal pollution and control, nearshore area development. This course is equivalent to CIVJ 5605 at Carleton University.

Course Component: Lecture

CVG 5125 Statistical Methods Hydrology (3 units)

Concepts of probability and random variables applied to hydrology. Statistical distributions, their approximation and analysis. Statistical inference, including tests of significance and estimation theory. Linear and multivariate correlation and regression techniques. Data generation and simulation techniques for design of water-resource systems. Introduction to hydrologic and meteorologic time series. This course is equivalent to CIVJ 5601 at Carleton University.

Course Component: Lecture

CVG 5130 Wastewater Treatment Process Design (3 units)

The physical, chemical and biological processes involved in the treatment of domestic and industrial wastes. Waste characteristics, stream assimilation, biological oxidation, aeration, sedimentation, anaerobic digestion, sludge disposal. This course is equivalent to ENVJ 5900 at Carleton University.

Course Component: Lecture

CVG 5132 Unit Operations of Water Treatment (3 units)

Unit operations and unit processes involved in the treatment of a water supply for various uses. Topics included are water quality, water microbiology, sedimentation, chemical treatment, disinfection, water chemistry, flocculation. This course is equivalent to ENVJ 5901 at Carleton University.

Course Component: Lecture

CVG 5133 Solid Waste Disposal (3 units)

Collection and disposal of solid wastes. Sanitary landfill, composting, incineration and other methods of disposal. Material and energy recovery. This course is equivalent to ENVJ 5906 at Carleton University.

Course Component: Lecture

CVG 5134 Chemistry for Environmental Engineering (3 units)

Dilute aqueous solution chemistry of water and wastewater treatment. Chemical kinetics and equilibrium. Carbonate, phosphate and chlorine chemistry. Precipitation and complex formation. Corrosion. Analytical techniques and applications. This course is equivalent to ENVJ 5907 at Carleton University.

Course Component: Lecture

CVG 5137 Water and Wastewater Treatment Process Analysis (3 units)

Mass balancing in complex systems. Reaction kinetics and kinetic data analysis: classical and computer based methods. Reactor design: ideal reactors and real reactors. Analysis of tracer tests. Interfacial mass transfer: common theories. Mass transfer models. This course is equivalent to ENVJ 5905 at Carleton University.

Course Component: Lecture

CVG 5137S Water and Wastewater Treatment Process Analysis (3 crédits / 3 units)

Volet / Course Component: Cours magistral / Lecture

CVG 5138 Advanced Water Treatment (3 units)

Scope, limitations and design procedures for water treatment processes for the removal of toxic and non-standard contaminants. Current water treatment problems and regulations, activated carbon treatment, ion exchange, disinfection practices and oxidation via advanced oxidation processes (ozonation and UV oxidation), iron and manganese removal, recent developments in coagulation, membranes, air stripping. This course is equivalent to ENVJ 5902 at Carleton University.

Course Component: Lecture

CVG 5139 Environmental Assessment of Civil Engineering Projects (3 units)

Procedures and methods for systematic evaluation of the environmental impact of civil engineering projects including wastewater disposal systems, solid waste disposal systems, and water resource development systems. This course is equivalent to ENVJ 5700 at Carleton University.

Course Component: Lecture

CVG 5142 Advanced Structural Dynamics (3 units)

Dynamic behaviour of civil engineering structures under excitations due to earthquakes, wind, waves, etc. Advanced methods in dynamic analysis of structures. Prediction of structural response. Design considerations. This course is equivalent to CIVJ 5201 at Carleton University.

Course Component: Lecture

CVG 5143 Advanced Structural Steel Design (3 units)

Analysis of thin-walled beams; design applications including members under combined forces; analysis and design of beams under non-uniform torsion; limit state design methodology; comparative study of modern structural steel standards; formulating elastic and plastic interaction relations for members under combined forces; designing columns, beams, and beam columns for cross-sectional strengths; local buckling and global stability considerations; design of bracing systems. This course is equivalent to CIVJ 5202 at Carleton University.

Course Component: Lecture

CVG 5144 Advanced Reinforced Concrete (3 units)

Study of the elastic and inelastic response of reinforced concrete structures under monotonic and cyclic loading. Methods for predicting structural behaviour of concrete elements. The relationship between recent research results and building codes. This course is equivalent to CIVJ 5300 at Carleton University.

Course Component: Lecture

CVG 5145 Theory of Elasticity (3 units)

Stress-strain relations. Theories of plane stress and plane strain. Use of stress functions, energy and variational methods in the analysis of elastostatic problems. This course is equivalent to CIVJ 5203 at Carleton University.

Course Component: Lecture

CVG 5146 Numerical Methods of Structural Analysis (3 units)

Numerical procedures and methods of successive approximations for the solution of structural problems. Virtual work, principles of minimum potential and complementary energy. Applications of variation and finite difference techniques to the solutions of complicated problems in beams, plates and shells. This course is equivalent to CIVJ 5302 at Carleton University.

Course Component: Lecture

CVG 5147 Theory of Plates and Shells (3 units)

Stress distribution in flat plates of various shapes. Large deflection theory, numerical methods. Membrane theory, bending theory for cylindrical shells, bending theory for shells of revolution. This course is equivalent to CIVJ 5204 at Carleton University.

Course Component: Lecture

CVG 5148 Prestressed Concrete Design (3 units)

Materials, methods of prestressing, prestress losses, and anchorage zone stresses. Elastic analysis, design and behaviour of simple and continuous prestressed concrete beams, frames and slabs. Discussion of current design specifications. Ultimate strength of members. This course is equivalent to CIVJ 5305 at Carleton University.

Course Component: Lecture

CVG 5149 Structural Stability (3 units)

Elastic, inelastic, and torsional buckling of columns, beam column behaviour, plane and space frame stability, lateral torsional buckling of beams, global buckling of truss systems, plate and shell buckling, local buckling in tubulars, use of energy methods, matrix analysis, and finite element analysis in modeling stability problems, bracing requirements, standard provisions and design considerations in structural stability. This course is equivalent to CIVJ 5304 at Carleton University.

Course Component: Lecture

CVG 5150 Advanced Concrete Technology (3 units)

Cement: types, hydration, physical properties; aggregate: classification, grading, properties; fresh concrete: influence of basis constituents and admixtures on workability, mixing, placing; strength of hardened concrete; nature of strength, influence of constituents, curing methods; durability; chemical attack, frost action, thermal effects; elasticity, shrinkage and creep; special concrete; lightweight, high density; mix design; approaches, weigh batching, volume proportioning, special mixes; field and laboratory test methods. This course is equivalent to CIVJ 5206 at Carleton University.

Course Component: Lecture

CVG 5151 Structural Design in Timber (3 units)

Characteristic values for timber and engineered wood products, modification factors used in design; design of members subjected to compression, bending, bi-axial bending and combined bending and axial loading; design of curved glued laminated beams, lateral design for wind and seismic loading; connection design.

Course Component: Lecture

CVG 5153 Wind Engineering (3 units)

The structure and climate of wind; wind loading on structures; wind induced dynamic problems of structures; environmental aerodynamics; dispersion of pollutant; analysis of wind data; experimental investigations. This course is equivalent to CIVJ 5209 at Carleton University.

Course Component: Lecture

CVG 5154 Random Vibration (3 units)

Descriptions of random data. Frequency domain analysis and time domain analysis. Stochastic response of structures; wind and earthquake excitation, etc. Data analysis techniques. Prediction for design purposes. Simulation of random processes. Special topics. This course is equivalent to CIVJ 5308 at Carleton University.

Course Component: Lecture

CVG 5155 Earthquake Engineering (3 units)

Nature and characteristics of earthquake motions. Non-linear response of single and multi-degree-of-freedom structures to seismic excitations. Modal superposition technique. Simplified procedures for dynamic structural analysis. Principles of earthquake resistant design. Strength, stiffness, ductility and energy absorption requirements of structures for seismic forces. Response spectra analysis. Current design procedures for aseismic design. Recent research on earthquake engineering. This course is equivalent to CIVJ 5306 at Carleton University.

Course Component: Lecture

CVG 5156 Finite Element Methods (3 units)

Review of basic matrix methods. Structural idealizations. The displacement versus the force method. Stiffness properties of structural elements. Finite elements in beam bending, plane stress and plate bending. This course is equivalent to CIVJ 5301 at Carleton University.

Course Component: Lecture

CVG 5157 Finite Element Methods (3 units)

Application of finite elements to folded plates, shells and continua. Convergence criteria and order of accuracy. Inertial and initial stress properties. Dynamic and buckling problems. Non-linear deflections and plasticity. This course is equivalent to CIVJ 5303 at Carleton University.

Course Component: Lecture

CVG 5158 Elements of Bridge Engineering (3 units)

Introduction; limit state design; highway bridge design loads; analysis and design of concrete decks; impact and dynamics; load capacity rating of existing bridges and construction in cold climate. This course is equivalent to CIVJ 5307 at Carleton University.

Course Component: Lecture

CVG 5159 Long Span Structures (3 units)

Mechanics of cables. Suspension bridges and cable-stayed bridges. Space structures. Design and construction of long span structures. Dynamics of long span bridges. Case studies. Future of long span structures. This course is equivalent to CIVJ 5309 at Carleton University.

Course Component: Lecture

CVG 5160 Sediment Transport (3 units)

An introduction to particle transport, with special emphasis on river engineering applications, including natural channel design. Sediment properties, initiation of motion, bed load, suspended load, fluvial dunes, alluvial channels, bank erosion and protection, natural channel design. Special topics include contaminated sediments, local scour, morphodynamic modelling, fluvial habitat. This course is equivalent to CIVJ 5503 at Carleton University.

Course Component: Lecture

CVG 5161 Mechanics of Unsaturated Soils (3 units)

Introduction to unsaturated soils, phases of an unsaturated soil, phase properties and relations, stress state variables for saturated and unsaturated soils. Measurement of soil suction: theory of soil suction, capillarity, measurements of total suction and matric suction. Flow Laws: flow of water and measurement of permeability, shear strength theory: history, failure envelope for unsaturated soils, triaxial and direct shear tests, typical results, simple testing procedures, volume change behavior including expansive soils behavior. Soil-water characteristic curve: its behavior and use in predicting the engineering properties of unsaturated soils, practical applications of the principles of unsaturated soils. This course is equivalent to CIVJ 5106 at Carleton University.

Course Component: Lecture

CVG 5162 River Hydraulics (3 units)

Advanced concepts of river hydraulics, with an emphasis on field measurement techniques and application of numerical models. Navier-Stokes equations, turbulence, flow resistance, numerical modelling of simplified momentum and continuity equations, field-based measurement and statistical analysis of velocity fields. Special topics include contaminant transport, morphodynamic modelling. This course is equivalent to CIVJ 5504 at Carleton University.

Course Component: Lecture

CVG 5175 Numerical Methods for Geotechnical Engineers (3 units)

Non-linear analysis of stresses and deformations using the effective stress concept; analysis of consolidation using the excess pore water pressure concept; flow through porous media; finite element, discrete element and finite difference methods; applications to foundations of structures, retaining walls, dams, tunnels, pipelines, human-made and natural slopes in rock and soil. This course is equivalent to CIVJ 5105 at Carleton University.

Course Component: Lecture

CVG 5178 Ice Mechanics (3 units)

Ice conditions in the Arctic; ice physics; classification of ice; mechanical properties of ice; mathematical modelling of creep and fracture behaviour of ice; offshore structures in arctic environments; ice forces acting on structures; ice induced vibrations; iceberg impact loads; physical modelling of ice-structure interaction; ice as a construction material; case histories. This course is equivalent to CIVJ 5108 at Carleton University.

Course Component: Lecture

CVG 5179 Anaerobic Digestion (3 units)

Advanced theoretical, biological, and practical aspects of anaerobic digestion processes. Principles to be applied to the design and application of conventional and advanced anaerobic processes used for treatment of municipal and industrial wastewaters. Topics to include microbiology and biochemistry fundamentals, techniques for monitoring anaerobic digestion performance, municipal sludge stabilization, anaerobic composting, anoxic/anaerobic bioremediation, Andrew's dynamic model. Design of the following: two-phase digestion; Downflow Stationary Fixed Film (DSFF) reactors; Upflow Anaerobic Sludge Blanket (UASB); Upflow Blanket Filter (UBF) reactors; and Anaerobic Sequencing Batch Reactors (ASBR). This course is equivalent to ENVJ 5908 at Carleton University.

Course Component: Lecture

CVG 5180 Biological Nutrient Removal (3 units)

Advanced theoretical, biological, and practical aspects of biological nutrient removal (BNR) (nitrification, denitrification and excess biological phosphorus) processes. Principles to be applied to the design and application of conventional and advanced BNR processes used for treatment of municipal and industrial wastewaters. Topics are as follows: microbiology and biochemistry fundamentals of BNR, nitrification process design of suspended growth and fixed film growth systems, denitrification process design of suspended growth and fixed film growth systems, excess biological phosphorus removal design including prefermentation. Design of 2, 3, 4 and 5 stage BNR systems. General activated sludge model and Simworks for BNR systems. Retrofit of existing plants and pilot plant testing for BNR. This course is equivalent to ENVJ 5909 at Carleton University.

Course Component: Lecture

CVG 5232 Unit Operations of Water Treatment Lab (1.5 unit)

Bench-scale and pilot-scale experiments required to: a) assess the suitability of different physicochemical processes for particular applications, and b) design a full-scale facility. Conventional analytical techniques used in water treatment (pH, alkalinity, hardness, turbidity, color, spectrophotometric analysis). Process analysis techniques for process evaluation and scale-up including: zone sedimentation, batch flux settling tests, coagulation with iron and aluminum salts, flocculent sedimentation, filtration and fluidization, flotation. This course is equivalent to ENVJ 5911 at Carleton University.

Course Component: Lecture

CVG 5132 is corequisite to CVG 5232.

CVG 5238 Advanced Water Treatment Process Lab (1.5 unit)

Bench-scale and pilot-scale experiments required to: a) assess the suitability of different physicochemical processes for the removal of toxic and non-standard contaminants, and b) design a full-scale facility. Tracer tests and non-ideal reactor behaviour, activated carbon adsorption equilibria and kinetics, aeration. Total organic carbon analysis, spectrophotometry. Process analysis, techniques for process evaluation and scale-up including: aeration, analysis of non-ideal flow conditions. Tracer study of three basins, adsorption isotherm tests, activated carbon mini-column tests, oxidation kinetic tests. This course is equivalent to ENVJ 5912 at Carleton University.

Course Component: Lecture

CVG 5138 is corequisite to CVG 5238.

CVG 5311 Bridge Design (3 units)

Design of highway bridges according to the Canadian Highway Bridge Design Code (CHBDC). Comparisons with other bridge codes (e.g., the American Code - AASHTO, the European, the New Zealand, and the British bridge codes). The topics covered include the following: main structural components of highway bridges; types of highway bridges; serviceability and ultimate limit state design requirements; design loads (dead loads, traffic loads, seismic loads, and wind loads); load combinations; code specifications for loading due to traffic (design lane, characteristics of design truck, positions of design truck on bridge, etc.); dynamic effects due to traffic loads; practical approaches specified in CHBDC for determining forces and deflections in structural members; principles of capacity design in highway bridges. This course is equivalent to CIVJ 5310 at Carleton University.

Course Component: Lecture

CVG 5312 Durability of Concrete Structures (3 units)

i) Properties of cementitious materials (constituents of concrete; hydration of cement; structure of hardened concrete; transport processes in concrete); ii) deterioration of concrete (built-in problems; construction defects; cracking; dimensional stability; alkali-aggregate reaction; sulphate attack; corrosion of reinforcing steel; freezing-thawing cycles); (iii) evaluation of concrete structures (inspection; in-situ testing; laboratory testing); (iv) repair and maintenance of concrete (repair materials; repair procedures and techniques; prevention, protection and maintenance); and, (v) durability design (philosophy; modelling of deterioration processes; service life prediction; life-cycle cost analysis.) This course is equivalent to CIVJ 5311 at Carleton University.

Course Component: Lecture

CVG 5313 Seismic Analysis and Design of Concrete Structures (3 units)

Review of seismic hazards in Canada, building code provisions for earthquake loads, uniform hazard spectra, linear elastic modal response spectrum analysis, linear elastic time history analysis, equivalent static force procedure, advanced state-of-the-art nonlinear modeling techniques including the finite element method and fiber modeling, emerging methods such as performance-based earthquake engineering and displacement-based design, ductility concepts, plastic hinge formulations, capacity design philosophy for seismic resistance, seismic analysis and design of common seismic force resisting systems including slender and squat shear walls, moment resisting frames, coupled shear walls, and coupling beams, shear wallmoment resisting frame interaction, and lessons learned from recent earthquakes. This course is equivalent to CIVJ 5312 at Carleton University.

Course Component: Lecture

CVG 5314 Geotechnical Hazards (3 units)

Understanding of assessment, prevention, and mitigation of geotechnical hazards, overview of natural and man-made geo-hazards; concepts of hazards, disasters, vulnerability and risks; geotechnical hazards induced by problem soils: fundamentals, assessment, and mitigation; landslide hazards and risk assessment: fundamentals, solutions (prevention, stabilization) for landslides and slope instability; monitoring of landslides and slope; mining geotechnical hazards: hazards related to surface mining geotechnical facilities; hazards related to underground mining geotechnical facilities.

Course Component: Lecture

CVG 5320 Fire Behaviour of Materials (3 units)

Fundamentals and scientific aspects of the behaviour of materials during fires and the fire hazards of materials. Topics to be covered include material specifications, thermal and mechanical properties, structural fire response, residual strength, failure criteria, mechanisms of flame retardancy, and standards and testing protocols. This course is equivalent to CIVE 5615 at Carleton University.

Course Component: Lecture

CVG 5321 Finite Elements in Field Problems (3 units)

Use of Galerkin and Ritz finite element formulation to solve one and two dimensional field problems, steady state and time-dependent phenomena involving potentials, heat transfer, fluid flow, diffusion, and dispersion with emphasis on practical applications. Courses EVG 7402 CVG 5321 cannot be combined for units. This course is equivalent to CIVE 5107 at Carleton University.

Course Component: Lecture

Prerequisite: Basic knowledge of third year-level undergraduate engineering mathematics. Courses EVG 7402, CVG 5321 cannot be combined for units.

CVG 5331 Sludge Utilization and Disposal (3 units)

Introduction to sludge processing technology and procedures to be used in the planning and design of sludge treatment processes. Evaluate the economics and performance of sludge unit process operations. Selection of methods for final disposition of sludge. This course is equivalent to ENVJ 5902 at Carleton University.

Course Component: Lecture

CVG 5366 Master's Seminar in Civil Engineering

Attendance and participation in the monthly seminar. All students must make one presentation and continue to attend throughout the program. Graded S (Satisfactory) / NS (Not satisfactory).

Course Component: Seminar

CVG 6000 Projet en génie civil / Civil Engineering Report (6 crédits / 6 units)

Ce cours est équivalent à CIVE 5900 à la Carleton University. / This course is equivalent to CIVE 5900 at Carleton University.

Volet / Course Component: Recherche / Research

CVG 6108 Directed Studies I (3 units)

Special courses set up for one student on an exceptional basis. Limited to one in the Master's level and to two total Master's plus PhD. This course is equivalent to CIVE 5906 at Carleton University.

Course Component: Research

Permission of the Department is required.

CVG 6109 Directed Studies II (3 units)

Special courses set up for one student on an exceptional basis. Limited to one in the Master's level and to two total Master's plus PhD. This course is equivalent to CIVE 5907 at Carleton University.

Course Component: Research

Permission of the Department is required.

CVG 6301 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6001 at Carleton University.

Course Component: Lecture

CVG 6303 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6003 at Carleton University.

Course Component: Lecture

CVG 6304 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6004 at Carleton University.

Course Component: Lecture

CVG 6305 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6005 at Carleton University.

Course Component: Lecture

CVG 6306 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6006 at Carleton University.

Course Component: Lecture

CVG 6307 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6007 at Carleton University.

Course Component: Lecture

CVG 6308 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6008 at Carleton University.

Course Component: Lecture

CVG 6309 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6009 at Carleton University.

Course Component: Lecture

CVG 6310 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6010 at Carleton University.

Course Component: Lecture

CVG 6311 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6011 at Carleton University.

Course Component: Lecture

CVG 6312 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6012 at Carleton University.

Course Component: Lecture

CVG 6313 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6013 at Carleton University.

Course Component: Lecture

CVG 6314 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6014 at Carleton University.

Course Component: Lecture

CVG 6315 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6015 at Carleton University.

Course Component: Lecture

CVG 6316 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6016 at Carleton University.

Course Component: Lecture

CVG 6317 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6017 at Carleton University.

Course Component: Lecture

CVG 6318 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6018 at Carleton University.

Course Component: Lecture

CVG 6319 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 6320 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVJ 6020 at Carleton University.

Course Component: Lecture

CVG 6508 Études dirigées I (3 crédits)

Cours individuels créés seulement pour les cas exceptionnels. Un étudiant peut en suivre un au niveau de la maîtrise ou un total de deux pour les études de maîtrise et de doctorat.

Volet : Cours magistral

CVG 6509 Études dirigées II (3 crédits)

Cours individuels créés seulement pour les cas exceptionnels. Un étudiant peut en suivre un au niveau de la maîtrise ou un total de deux pour les études de maîtrise et de doctorat.

Volet : Cours magistral

CVG 7100 Case Studies in Geotechnical (3 units)

This course is equivalent to CIVE 5209 at Carleton University.

Course Component: Lecture

CVG 7101 Advanced Soil Mechanics I (3 units)

This course is equivalent to CIVE 5300 at Carleton University.

Course Component: Lecture

CVG 7102 Advanced Soil Mechanics II (3 units)

Course Component: Lecture

CVG 7103 Pavement and Materials (3 units)

This course is equivalent to CIVE 5303 at Carleton University.

Course Component: Lecture

CVG 7104 Earth Retaining Structures (3 units)

This course is equivalent to CIVE 5500 at Carleton University.

Course Component: Lecture

CVG 7105 Foundation Engineering (3 units)

This course is equivalent to CIVE 5501 at Carleton University.

Course Component: Lecture

CVG 7106 In Situ Meth in Geomechanics (3 units)

This course is equivalent to CIVE 5502 at Carleton University.

Course Component: Lecture

CVG 7107 Numerical Methods in Geomechanics (3 units)

This course is equivalent to CIVE 5503 at Carleton University.

Course Component: Lecture

CVG 7108 Seepage and Water Flow Through Soils (3 units)

This course is equivalent to CIVE 5504 at Carleton University.

Course Component: Lecture

CVG 7109 Geotechnical Earthquake Engineering (3 units)

This course is equivalent to CIVE 5505 at Carleton University.

Course Component: Lecture

CVG 7120 Introductory Elasticity (3 units)

This course is equivalent to CIVE 5101 at Carleton University.

Course Component: Lecture

CVG 7121 Advanced Elasticity (3 units)

This course is equivalent to CIVE 5102 at Carleton University.

Course Component: Lecture

CVG 7122 Finite Element Methods Stress Analysis (3 units)

This course is equivalent to CIVE 5103 at Carleton University.

Course Component: Lecture

CVG 7123 Earthquake Analysis and Design of Structures (3 units)

This course is equivalent to CIVE 5104 at Carleton University.

Course Component: Lecture

CVG 7124 Advanced Finite Element Analysis in Structural Mechanics (3 units)

This course is equivalent to CIVE 5105 at Carleton University.

Course Component: Lecture

CVG 7125 Theory of Structural Stability (3 units)

This course is equivalent to CIVE 5203 at Carleton University.

Course Component: Lecture

CVG 7126 Behaviour of Steel Structure (3 units)

This course is equivalent to CIVE 5204 at Carleton University.

Course Component: Lecture

CVG 7127 Analysis of Elastic Structures (3 units)

This course is equivalent to CIVE 5205 at Carleton University.

Course Component: Lecture

CVG 7128 Prestressed Concrete (3 units)

This course is equivalent to CIVE 5206 at Carleton University.

Course Component: Lecture

CVG 7129 Advanced Structural Design (3 units)

Course Component: Lecture

CVG 7130 Advanced Reinforced Concrete (3 units)

This course is equivalent to CIVE 5208 at Carleton University.

Course Component: Lecture

CVG 7131 Project Management (3 units)

This course is equivalent to CIVE 5600 at Carleton University.

Course Component: Lecture

CVG 7132 Computer-Aided Design of Building Structures (3 units)

Course Component: Lecture

CVG 7137 Dynamics of Structures (3 units)

This course is equivalent to CIVE 5106 at Carleton University.

Course Component: Lecture

CVG 7138 Engineered Masonry Behaviour and Design (3 units)

This course is equivalent to CIVE 5200 at Carleton University.

Course Component: Lecture

CVG 7139 Behaviour and Design of Steel Structures (3 units)

Course Component: Lecture

CVG 7140 Statistics, Probabilities and Decision-Making (3 units)

This course is equivalent to CIVE 5601 at Carleton University.

Course Component: Lecture

CVG 7141 Advanced Methods in Computer-Aided Design (3 units)

This course is equivalent to CIVE 5602 at Carleton University.

Course Component: Lecture

CVG 7142 Engineering Management (3 units)

Course Component: Lecture

CVG 7143 Design of Steel Bridges (3 units)

This course is equivalent to CIVE 5605 at Carleton University.

Course Component: Lecture

CVG 7144 Design of Concrete Bridges (3 units)

This course is equivalent to CIVE 5606 at Carleton University.

Course Component: Lecture

CVG 7145 Introduction to Bridge Design (3 units)

This course is equivalent to CIVE 5607 at Carleton University.

Course Component: Lecture

CVG 7150 Intercity Transportation, Planning and Management (3 units)

This course is equivalent to CIVE 5304 at Carleton University.

Course Component: Lecture

CVG 7151 Traffic Engineering (3 units)

This course is equivalent to CIVE 5305 at Carleton University.

Course Component: Lecture

CVG 7152 Highway Materials (3 units)

This course is equivalent to CIVE 5306 at Carleton University.

Course Component: Lecture

CVG 7153 Urban Transportation and Management (3 units)

This course is equivalent to CIVE 5307 at Carleton University.

Course Component: Lecture

CVG 7154 Geometric Design (3 units)

This course is equivalent to CIVE 5308 at Carleton University.

Course Component: Lecture

CVG 7155 Intercity Transportation Supply (3 units)

This course is equivalent to CIVE 5309 at Carleton University.

Course Component: Lecture

CVG 7156 Transportation Economics and Policy (3 units)

This course is equivalent to CIVE 5401 at Carleton University.

Course Component: Lecture

CVG 7158 Airport Planning (3 units)

This course is equivalent to CIVE 5403 at Carleton University.

Course Component: Lecture

CVG 7159 Transportation Terminal (3 units)

This course is equivalent to CIVE 5402 at Carleton University.

Course Component: Lecture

CVG 7160 Biofilm Processes in Waste-Water Treatment (3 units)

This course is equivalent to ENVE 5001 at Carleton University.

Course Component: Lecture

CVG 7161 Traffic Related Air Pollution (3 units)

This course is equivalent to ENVE 5102 at Carleton University.

Course Component: Lecture

CVG 7162 Ambient Air Quality and Pollution Modelling (3 units)

This course is equivalent to ENVE 5103 at Carleton University.

Course Component: Lecture

CVG 7163 Case Studies in Hydrogeology (3 units)

This course is equivalent to ENVE 5302 at Carleton University.

Course Component: Lecture

CVG 7164 Multiphase Flow and Contaminant Transport Modelling (3 units)

Course Component: Lecture

CVG 7170 Fundamentals of Fire Safety Engineering (3 units)

This course is equivalent to CIVE 5609 at Carleton University.

Course Component: Lecture

CVG 7171 Fire Dynamics I (3 units)

This course is equivalent to CIVE 5610 at Carleton University.

Course Component: Lecture

CVG 7172 Fire Dynamics II (3 units)

This course is equivalent to CIVE 5613 at Carleton University.

Course Component: Lecture

CVG 7173 People in Fires (3 units)

This course is equivalent to CIVE 5611 at Carleton University.

Course Component: Lecture

CVG 7174 Fire Modelling (3 units)

This course is equivalent to CIVE 5612 at Carleton University.

Course Component: Lecture

CVG 7175 Design for Fire Resistance (3 units)

This course is equivalent to CIVE 5614 at Carleton University.

Course Component: Lecture

CVG 7300 Special Topics in Civil Engineering (3 units)

This course is equivalent to CIVE 5705 at Carleton University.

Course Component: Lecture

CVG 7301 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7302 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7303 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7304 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7305 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7306 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7307 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7308 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7309 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7310 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7311 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7312 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7313 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7314 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7315 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7316 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7317 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7318 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7319 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 7320 Special Topics in Civil Engineering (3 units)

Course Component: Lecture

CVG 8366 Doctoral Seminar in Civil Engineering

Attendance and participation in the monthly seminar. All students must make one presentation and continue to attend throughout the program. Graded S (Satisfactory) / NS (Not satisfactory).

Course Component: Seminar

CVG 9998 Examen général de doctorat / Comprehensive Examination (Phd)

Ce cours est équivalent à CIVE 6902 à la Carleton University. / This course is equivalent to CIVE 6902 at Carleton University.

Volet / Course Component: Recherche / Research

ISP 5101 Decision at the Interface of Science and Policy (3 units)

This course explores a number of critical issues in the design and implementation of science (or, more generally, evidence)-based policy. Topics will include: the nature of scientific evidence; who has standing in the provisioning of scientific evidence; the science and non-science of risk assessment; ethical dimensions of policy design and implementation; the role of science in policy design and implementation; the policy making process; and science policy performance evaluation.

Course Component: Lecture

ISP 5102 Science and Technology Governance and Communication (3 units)

This course explores a number of critical issues in the governance of science and technology (S&T) in democratic societies, with particular emphasis on the Canadian context. Topics will include the following: the history of S&T governance and communication in both Canada and abroad; an overview of the Canadian S&T policy and regulatory landscape; the role of government, the private sector and civil society in S&T governance; policy and regulatory experiments in fostering innovation (and the success thereof); the evolution of public S&T communication strategies and governance of emerging technologies.

Course Component: Lecture

ISP 5103 Capstone Seminar in Science, Society and Policy (3 units)

Involves partnering with organization(s) working on an issue relating to science, society and policy. In consultation with a member of the organization, students analyze the issue and complete a written report, either singly or in interdisciplinary teams, under the direction of the seminar professor who is responsible for evaluating the report.

Course Component: Lecture

ISP 5501 Prise de décision à l'interface de la science et des politiques (3 crédits)

Ce cours approfondit un certain nombre d'enjeux critiques liés à la conception et à la mise en oeuvre de politiques scientifiques (ou, de façon plus générale, fondées sur des preuves). Les sujets abordés incluent les suivants : la nature de la preuve scientifique; qui a qualité pour fournir des preuves scientifiques; le côté scientifique et le côté non scientifique de l'évaluation des risques; les dimensions éthiques de la conception et de la mise en oeuvre des politiques publiques; le rôle de la science dans la conception et la mise en oeuvre des politiques publiques; le processus d'élaboration des politiques publiques; et l'évaluation du rendement des politiques publiques en matière de sciences.

Volet : Cours magistral

ISP 5502 Gouvernance et communication en science et technologie (3 crédits)

Ce cours approfondit un certain nombre d'enjeux critiques liés à la gouvernance des sciences et de la technologie (S et T) dans les sociétés démocratiques et, en particulier, dans le contexte canadien. Les sujets abordés incluent les suivants : l'histoire de la gouvernance et de la communication en sciences et technologie au Canada et à l'étranger; un aperçu du paysage réglementaire et politique canadien ayant trait aux sciences et à la technologie; le rôle du gouvernement, du secteur privé et de la société civile dans la gouvernance des sciences et de la technologie; les expériences relatives aux politiques et à la réglementation menées en vue de favoriser l'innovation (et leur réussite); l'évolution des stratégies de communication publique concernant les sciences et la technologie et la gouvernance des nouvelles technologies.

Volet : Cours magistral

ISP 5503 Séminaire d'intégration en science, société et politique publique (3 crédits)

Involves partnering with organization(s) working on an issue relating to science, society and policy. In consultation with a member of the organization, students analyze the issue and complete a written report, either singly or in interdisciplinary teams, under the direction of the seminar professor who is responsible for evaluating the report.

Volet : Cours magistral
